**Application Filed:** 8/21/2025  
**45 Day Expiration:** 10/5/2025

### ITEM #1

**GENERAL INFORMATION:**

The applicant seeks approval for:

Certificate of Appropriateness for removal of rear porch and construction of new covered patio and balcony

**STAFF RECOMMENDATION:**

The Historic Preservation Office recommends APPROVAL A MODIFICATION of the proposed scope of work based on the following recommendations:

*The Design Guidelines for El Paso's Historic Districts, Sites, and Properties* recommend the following:

- *Introduce additions in locations that are not visible from the street-generally on rear elevations.*
- *Locate additions carefully so they do not damage or conceal significant building features or details.*
- *It is not appropriate to introduce an addition if it requires the removal of character-defining building features such as patios, mature vegetation or a detached structure.*
- *Design an addition so it is compatible in roof form, proportions, materials and details with the existing structure.*
- *Design new buildings and their features to be compatible in scale, materials, proportions and details with existing historic structures.*
- *Design an addition that is compatible with but, subtly different from existing historic homes in the district.*
- *Design an addition so that if removed in the future, the historic building's form and character defining features are not obscured, damaged, or destroyed.*

*The Secretary of the Interior's Standards for Rehabilitation* recommend the following:

- *The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.*
- *Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.*
- *New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*
- *New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*

*The modification is that the roof be made a flat roof to limit the alteration to the existing roof.*
