The Economic and International Development Department, in coordination with Planning and Inspections, proposes several amendments to Title 20 – Zoning of the El Paso City Code. These Code amendments will support key Economic Development Initiatives in the focus areas of Advanced Manufacturing, Advanced Logistics, Destination Entertainment, and Redevelopment. The proposed changes will clarify existing regulations and policies, fill in gaps and overall improve speed to market.

Background – Advanced Manufacturing

Plastics manufacturing is not an activity well fleshed out in our zoning code. A classification of “Plastic products manufacturing” exists beginning at M-2 but has no definition applied to it, which results in no differentiation in intensities. The Advanced Manufacturing District will require a level of plastics manufacturing, anticipated specifically with additive manufacturing processes taking a controlled amount of base material directly into a final product. The 601 Corridor will likely find interest in plastics finishing or assemblage.

Proposed Changes

- Provide a definition to the existing use “Plastic products manufacturing” which is currently only available beginning in M-2
- Differentiate between an intensive and less intensive application, by adding a new “Plastic products finishing” use
- Update Appendix A to add the heavier “Plastic products manufacturing” by Special Permit in M-1
- Update Appendix A to add the lighter “Plastic products finishing” by right in M-1
- Remove “Computer electronic product assembly” from Appendix A, as it conflicts with the identical “Computer product manufacturing”

Background – Advanced Logistics

Texas is a growing data center market and El Paso is well-positioned to attract this type of investment. Research of comparable markets shows that relatively few local zoning codes define and regulate data centers. According to the American Planning Association (APA), some localities lack the process to allow, or issue a permit for, data centers altogether. The APA proposes making data centers a distinct use in order to ensure clearly defined zoning requirements among City staff, Council, and stakeholders. Unclear zoning requirements can result in ad hoc use determinations and slow down the application/review process. The current definition for Data processing center does not capture the scale or intensity of the contemporary industry model. To prevent confusion and inappropriate

Proposed Changes

- Provide a definition for “Data processing center (hyperscale)” to reflect current industry standards and differentiate this higher intensity use
- Add definition for Security fence
- Add Section 20.16.030.B.3 to specify that Security fences shall not exceed twelve feet (12’) in height
- Update Appendix A to allow “Data processing center (hyperscale)” by right in C-4, M-1, M-2; via MZP in IM-U
- Revise parking calculations to reflect best practices and the unique configuration potential of hyperscale data center uses

Background – Destination Entertainment

As part of the City’s commitment to support a high quality of life and provide exceptional recreational and cultural activities, we have developed an attraction strategy for the Destination Entertainment sector. Destination entertainment venues provide an economic benefit to their communities and can be used in concert with reinvestment strategies to spur growth. Aquariums provide family-friendly activities that double as centers for animal rescue, care and rehabilitation, scientific research, education and conservation.

Proposed Changes

- Provide a definition for “Aquarium”
- Update Appendix A to add “Aquarium” by right in C-3, C-4, and C-5; via MZP in GM-U

Background - Redevelopment

Currently “Brewery” is listed in Appendix A, but has no stand-alone definition, instead being lumped under “Food products manufacturing (other)”. This is confusing for business owners and proprietors. In addition, the use of Brewery in the zoning code is meant for larger scale industrial operations, where the majority of sales are related to production and distribution. Most brewery operations are closer to what the industry refers to as a “brewpub”, a hybrid restaurant-brewery that typically produces beer for sale in an on-site restaurant and bar. Having these uses clearly defined will make it easier for potential businesses to identify permissibility and site restrictions. This will also better align City standards with those of the Texas Alcohol and Beverage Commission.

Proposed Changes

- Provide a definition for “Brewery”
- Provide a definition for “Brewpub”
- Update Appendix A to allow “Brewpub” by right in C-1, C-2, C-3, C-4, C-5; via DSDP in S-D, P-C, and P-I; via MZP in GM-U and IM-U to match the permissibility of bar/restaurant
