

**CITY OF EL PASO, TEXAS
AGENDA ITEM
DEPARTMENT HEAD'S SUMMARY FORM**

AGENDA DATE: April 9, 2024

PUBLIC HEARING DATE: May 7, 2024

CONTACT PERSON(S) NAME AND PHONE NUMBER: Philip F. Etiwe, (915) 212-1553
Nina Rodriguez, (915) 212-1561

DISTRICT(S) AFFECTED: District 7

STRATEGIC GOAL: #3 Promote the Visual Image of El Paso

SUBGOAL: 3.2 Set one standard for infrastructure across the city

SUBJECT:

An Ordinance changing the zoning of a portion of Tract 12-B, Block 24, Socorro Grant, City of El Paso, El Paso County, Texas from R-F (Ranch and Farm) to M-1 (Light Manufacturing), and imposing a condition. The penalty is as provided for in Chapter 20.24 of the El Paso City Code.

The proposed rezoning request is based on the proposed Comprehensive Plan and Future Land Use Map (FLUM) amendment (PLCP24-00001) request of *Plan El Paso*, the City's adopted comprehensive plan.

Subject Property: South of Winn Rd. and East of Southside Rd.

Applicant: City of El Paso – El Paso Water, PZRZ23-00012

BACKGROUND / DISCUSSION:

The applicant is requesting to rezone the subject property to allow for "concrete mixing plant, permanent". The City Plan Commission reviewed this case on February 22, 2024 and was unable to arrive at a formal recommendation to City Council. As of March 26, 2024, the Planning Division received one (1) email in support and thirteen (13) emails from ten (10) individuals and one (1) phone call of opposition to the rezoning request. This application is running concurrently with a comprehensive plan amendment application (case PLCP24-00001). See attached staff report for additional information.

ORDINANCE NO. _____

AN ORDINANCE CHANGING THE ZONING OF A PORTION OF TRACT 12-B, BLOCK 24, SOCORRO GRANT, CITY OF EL PASO, EL PASO COUNTY, TEXAS FROM R-F (RANCH AND FARM) TO M-1 (LIGHT MANUFACTURING), AND IMPOSING A CONDITION. THE PENALTY IS AS PROVIDED FOR IN CHAPTER 20.24 OF THE EL PASO CITY CODE.

NOW THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EL PASO:

Pursuant to Section 20.04.360 of the El Paso City Code, that the zoning of a portion of Tract 12-B, Block 24, located in the City of El Paso, El Paso County, Texas, and as more particularly described by metes and bounds on the attached Exhibit "A", incorporated by reference, be changed from **R-F (Ranch and Farm)** to **M-1 (Light Manufacturing)**, as defined in Section 20.06.020, and that the zoning map of the City of El Paso be revised accordingly.

Further, that the property described above be subject to the following condition which is necessitated by and attributable to the increased density of use generated by the change of zoning in order to protect the health, safety and welfare of the residents of the City:

1. That a Detailed Site Development Plan be reviewed and approved as per El Paso City Code prior to issuance of any certificates of occupancy or certificates of completion.

The penalties for violating the standards imposed through this rezoning ordinance are found in Section 20.24 of the El Paso City Code.

ADOPTED this _____ day of _____, **2024**.

City Plan Commission — February 22, 2024 **REVISED**

REZONING

CASE NUMBER: PZRZ23-00012
CASE MANAGER: Nina Rodriguez, (915) 212-1561, RodriguezNA@elpasotexas.gov
PROPERTY OWNER: City of El Paso - El Paso Water
REPRESENTATIVE: Conde, Inc.
LOCATION: Generally South of Winn Rd. and East of Southside Rd. (District 7)
PROPERTY AREA: 10 acres
REQUEST: Rezone from R-F (Ranch and Farm) to M-1 (Light Manufacturing)
RELATED APPLICATIONS: PLCP24-00001 Comprehensive Plan Amendment
PUBLIC INPUT: One (1) email of support and thirteen (13) emails from ten (10) individuals in opposition, and one (1) phone call of opposition received as of February 22, 2024

SUMMARY OF REQUEST: The applicant is requesting to rezone the subject property from R-F (Ranch and Farm) to M-1 (Light Manufacturing) to allow for the use of a “concrete mixing plant, permanent” as classified by the City of El Paso’s Zoning Administrator. A “concrete mixing plat, permanent” is defined as “the permanent use of property for the mixing of concrete, including equipment used to mix the various ingredients to form concrete. This definition does not apply to the manufacturing or processing of raw materials”. The proposed zoning is consistent with the existing industrial zoning districts immediately west and south of the subject property.

SUMMARY OF STAFF’S RECOMMENDATION: Staff recommends **APPROVAL WITH CONDITION** of the request as the proposed use and rezoning is compatible with surrounding land uses. The request is also based on approval of the Comprehensive Plan and Future Land Use Map (FLUM) amendment (PLCP24-00001) request of *Plan El Paso*, the City’s adopted comprehensive plan. Staff recommends imposing the following condition:

1. A Detailed Site Development Plan shall be reviewed and approved as per El Paso City Code prior to issuance of any certificates of occupancy or certificates of completion.

Figure A. Subject Property & Immediate Surroundings

DESCRIPTION OF REQUEST: The applicant is requesting to rezone a 10-acre property from R-F (Ranch and Farm) to M-1 (Light Manufacturing) to allow for the use of a concrete mixing plant, permanent use. This portion of land is part of a larger property managed by El Paso Water. The conceptual site plan does not feature any proposed structures, but does include various types of heavy equipment on the property associated with this use. The site plan also demonstrates a ponding area along the eastern property line. Access to the subject property is proposed from an access easement connecting to Winn Road.

COMPATIBILITY WITH NEIGHBORHOOD CHARACTER: The proposed concrete mixing plant, permanent and M-1 (Light Manufacturing) district is consistent with the surrounding manufacturing districts in the nearby area. Properties to the south and east are zoned R-F (Ranch and Farm) and are currently vacant. The property to the north is zoned M-1/c (Light Manufacturing/conditions) and is currently vacant, while the properties to the west are zoned M-2 (Heavy Manufacturing) and consists of a wastewater plant. The rezoning will also expand the manufacturing zoning districts already present in the vicinity of the area. The distance to the nearest school, Keys Elementary Academy, is 1.68 miles and the distance to the nearest park, Rio Bosque Park is 0.13 miles.

COMPLIANCE WITH <i>PLAN EL PASO</i>/REZONING POLICY – When evaluating whether a proposed rezoning is in accordance with <i>Plan El Paso</i>, consider the following factors:	
Criteria	Does the Request Comply?
<p>Future Land Use Map: Proposed zone change is compatible with the Future Land Use designation for the property:</p> <p>Current FLUM Designation: O-1 – Preserve: Publicly owned land such as the Franklin Mountains and Hueco Tanks State Parks, all City and County parks and public drainage areas, and cemeteries (even if private). These lands will not be developed due to their ownership and current use.</p> <p>Proposed FLUM Designation: G-7, Industrial and/or Railyards: This sector applies to industrial parks, large free-standing industrial uses, refineries, non-military airfields, trucking terminals, and mines, all on large tracts in areas dominated by vehicles. This sector is essential to El Paso’s economy; however, when an industrial use becomes obsolete, there can be potential for mixed-use redevelopment of the site. This sector also includes the existing rail yards which could be redeveloped as mixed-use communities if the rail yards were moved out of town.</p>	<p>The proposed zoning district of M-1 (Light Industrial) and use of concrete mixing plant, permanent align with the intent and spirit of the proposed G-7, Industrial and/or Railyards future land use designation of <i>Plan El Paso</i> proposed by PLCP24-00001.</p>

COMPLIANCE WITH <i>PLAN EL PASO</i>/REZONING POLICY – When evaluating whether a proposed rezoning is in accordance with <i>Plan El Paso</i>, consider the following factors:	
Compatibility with Surroundings: The proposed zoning district is compatible with those surrounding the site: M-1 (Light Manufacturing) The purpose of this district is to provide locations for light-intensity industries involving manufacturing, assembling, distribution and warehousing. It is intended that the districts will serve the entire city and will permit supporting commercial uses. The regulations of the districts are intended to preserve a light industrial nature particularly with regard to noise, smoke, odors, dust, vibrations and other noxious conditions.	Yes. The areas adjacent to the north and west of the subject property are already zoned M-1/c (Light Manufacturing/conditions) and M-2 (Heavy Manufacturing). Rezoning the property to M-1 (Manufacturing) will expand the manufacturing zoning districts already present in the area.
Preferred Development Locations: Located along an arterial (or greater street classification) or the intersection of two collectors (or greater street classification). The site for proposed rezoning is not located mid-block, resulting in it being the only property on the block with an alternative zoning district, density, use and/or land use.	Yes. Access to the subject property is proposed from an access easement connecting to Winn Road which is classified as collector per the City of El Paso's Major Thoroughfare Plan (MTP), and connects to both Pan American Drive and Loya Road, both classified as local roads per the City of El Paso's MTP.
THE PROPOSED ZONING DISTRICT'S EFFECT ON THE PROPERTY AND SURROUNDING PROPERTY, AFTER EVALUATING THE FOLLOWING FACTORS:	
Historic District or Special Designations & Study Area Plans: Any historic district or other special designations that may be applicable. Any adopted small areas plans, including land-use maps in those plans.	None. This property does not fall within any historic districts, special designations, or study plan areas.
Potential Adverse Effects: Potential adverse effects that might be caused by approval or denial of the requested rezoning.	There are no anticipated adverse impacts.
Natural Environment: Anticipated effects on the natural environment.	The subject property was formerly vacant land and is currently being utilized as a temporary concrete mixing plant. The existing wetland park is located a distance from the subject property, not effects are anticipated. The manager of the wetlands also noted no anticipated effects from this proposal (portion of Attachment 5).
Stability: Whether the area is stable or in transition.	The area is in transition with the adjacent property to the west rezoned from R-F (Ranch and Farm) to M-2 (Heavy Industrial) in 2022. Several nearby properties northwest of the subject property also part of this rezoning resulting in a large portion of the area being rezoned from to M-2 (Heavy Industrial).
Socioeconomic & Physical Conditions: Any changed social, economic, or physical conditions that make the existing zoning no longer suitable for the property.	Adjacent properties to the north and west of the subject property are zoned manufacturing. Rezoning the subject property from R-F (Ranch and Farm) to M-1 (Light Manufacturing) will expand manufacturing zoning in the area.

ADEQUACY OF PUBLIC FACILITIES, SERVICES AND INFRASTRUCTURE: Access to the subject property is proposed from an access easement connecting to Winn Road which is classified as collector per the City of El Paso's Major Thoroughfare Plan (MTP). There are no bus stops within a quarter mile (1/4) of the property.

SUMMARY OF DEPARTMENTAL REVIEW COMMENTS: No adverse comments were received for the rezoning request from the reviewing departments.

PUBLIC COMMENT: The subject property lies within the boundaries of the Mission Valley Civic Association and Corridor 20 Civic Association which were notified of the rezoning request. Property owners within 300 feet of the subject property were noticed of the rezone request on January 26, 2024. by the City of El Paso Planning and Inspections Department. As of February 22, 2024, the Planning Division has received one (1) email in support and thirteen (13) emails from ten (10) individuals in opposition, and one (1) phone call in opposition. to the rezoning request. The comment in support of the rezoning request expresses their belief that the operation of the batch plan is located will not have a significant or adverse impact on the park (Rio Bosque park). Comments of opposition cite concerns of loss on open space, impact on wildlife, environmental impact to the Rio Bosque, pollution, health hazards, increase of noise and emissions from heavy trucks, decline of surrounding property values, and proximity to residential properties.

RELATED APPLICATIONS: There is a Future Land Use Map Amendment application (PLCP24-00001) running concurrently with the current rezoning application to change the Future Land Use Map designation of the property.

CITY PLAN COMMISSION OPTIONS: The purpose of the Zoning Ordinance is to promote the health, safety, morals and general welfare of the City. The City Plan Commission (CPC) has the authority to advise City Council on Zoning matters. In evaluating the request, the CPC may take any of the following actions:

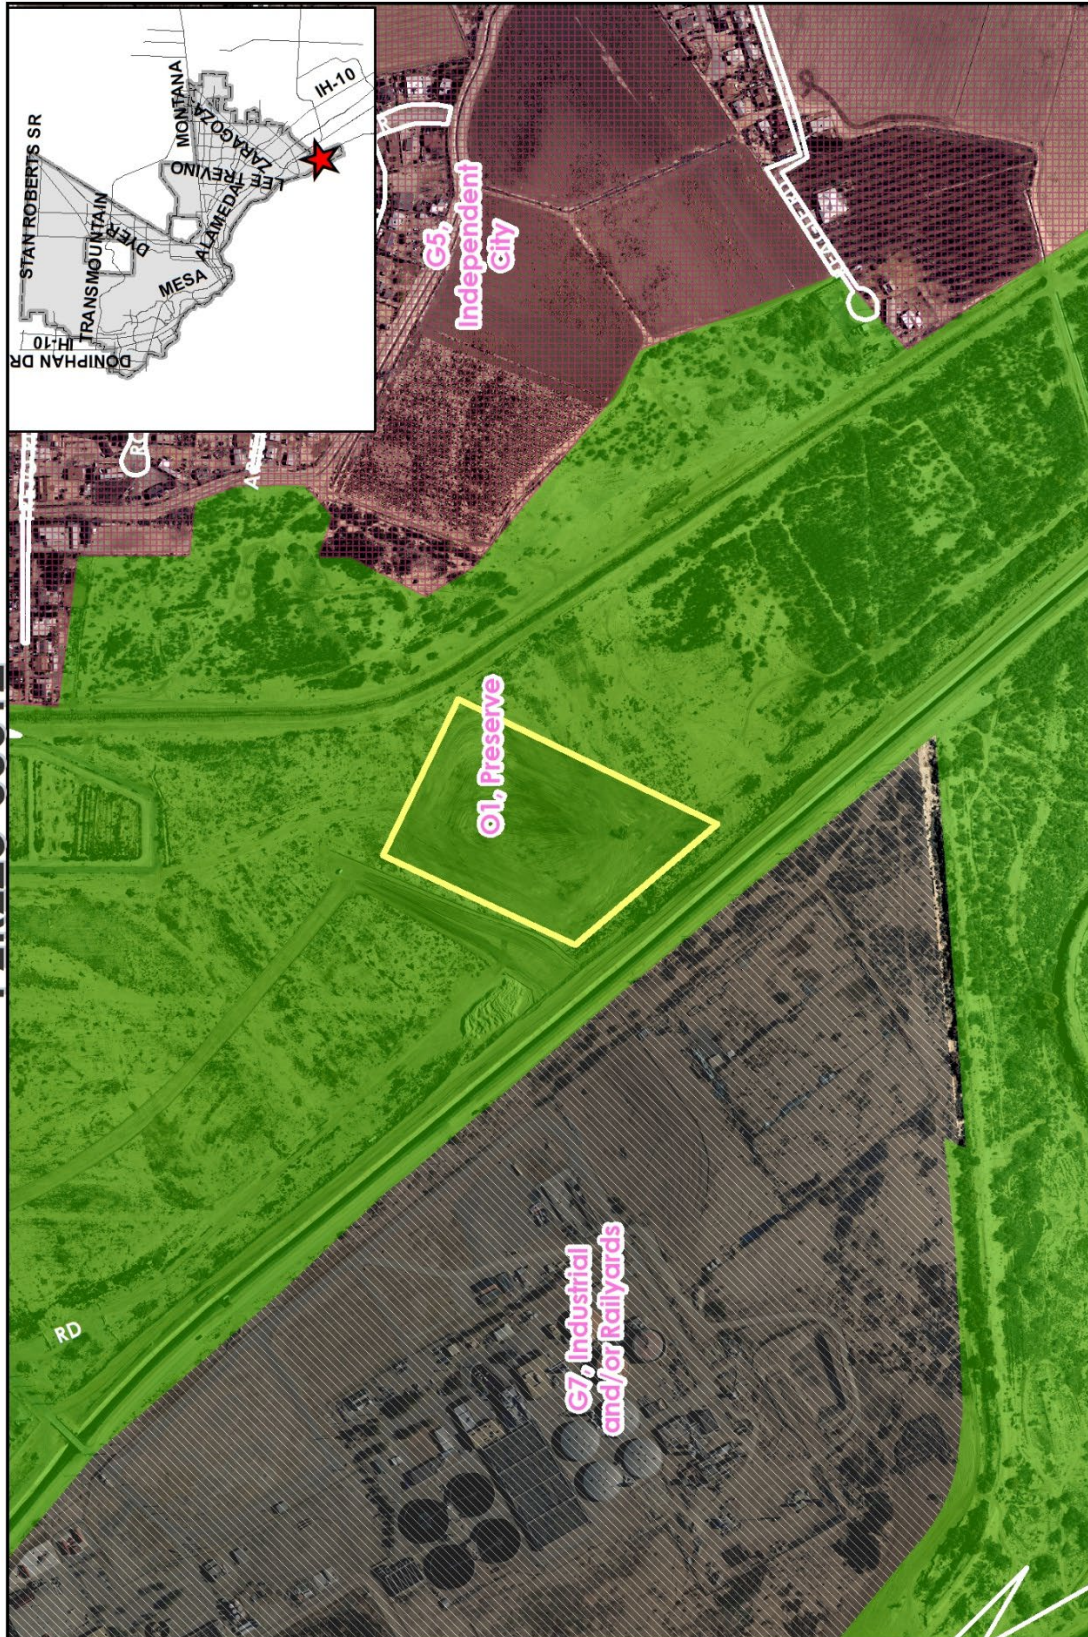

1. **Recommend Approval** of the rezoning request, finding that the request is in conformance with the review criteria of *Plan El Paso* as reflected in the Staff Report, or that the request is in conformance with other criteria that the CPC identifies from the Comprehensive Plan.
2. **Recommend Approval of the rezoning request With Modifications** to bring the request into conformance with the review criteria of *Plan El Paso* as reflected in the Staff Report, or other criteria that the CPC identifies from the Comprehensive Plan. (Staff Recommendation)
3. **Recommend Denial** of the rezoning request, finding that the request does not conform to the review criteria of *Plan El Paso* as reflected in the Staff Report, or other criteria that the CPC identifies from the Comprehensive Plan.

ATTACHMENT 3

Planning and Inspections Department - Planning Division

1. A Future Land Use Map amendment changing the land use designation from o-1, Preserve to G-7, Industrial and/or Railyards will be required for the proposed zone change.
2. The property has not been platted, a plat may be required prior to construction.
3. Staff recommends Approval with Condition of this application. The condition being:

A Detailed Site Development Plan shall be reviewed and approved as per El Paso City Code prior to issuance of any certificates of occupancy or certificates of completion.

Planning and Inspections Department – Plan Review & Landscaping Division

The generalized site plan is not being reviewed for conformance due to conceptual nature. No objections to proposed rezoning. At the time of submittal for building permit, the project will need to comply with all applicable provisions of the ICC, TAS and Municipal Code.

Planning and Inspections Department – Land Development

1. Recommend approval.
2. The complete area is in the flood zone area “AH”, and all storm-water runoff discharge volumes including fill displacement shall be retained within this subdivision’s limits in compliance with the provision of (DSC PANEL 1-4C-J, 19.19.010A and DDM 11.1).
3. The complete drainage system must be completed in phase I, as per section Code 19.08.010, section D, all drainage structures and ponding areas serving the subdivision are constructed as part of the initial phase of the development.

Note: Comments will be addressed at permitting stage.

Some people who received this message don't often get email from jsproul@utep.edu. [Learn why this is important](#)

CAUTION: This email originated from outside of the City of El Paso. Do not click links or open attachments unless you recognize the sender and know the content is safe. If suspicious, use **Phish Alert** or forward to SpamReport@elpasotexas.gov.

Gentlemen,

I understand a Special Permit application has been submitted for the concrete batch plant that Jobe Materials recently installed on Tract 12B, Block 24, Socorro Grant Surveys. I also understand a recognized neighborhood association has objected to granting this permit and has based its objection in part on potential impacts to Rio Bosque Wetlands Park.

To assist the Planning and Inspections Department and the City Plan Commission in their evaluation of the Special Permit application, I would like to offer my perspective on this objection. I have been the manager of Rio Bosque Wetlands Park for the past 25 years.

In my view, the clearing of the land where the batch plant is located did have an indirect negative impact on the park. Rio Bosque is managed as a natural area, and it benefits from having biological connectivity with other areas of undeveloped open space. The strip of undeveloped City-owned land between the Riverside Canal and the Franklin Drain is a valuable open-space buffer for the park. It supports vegetation comparable to that found in much of the park, and many animals, especially birds, move back and forth between the two areas. Each time undeveloped lands surrounding the park are cleared and developed in various ways, the value of the park as a natural area is diminished. The clearing of the batch-plant site contributed incrementally to that process.

That said, I do not expect operation of the batch plant to have significant adverse impacts on the park. Possible impacts from such a facility might include drift of airborne particulate matter, noise associated with plant operations, and increased vehicle traffic associated with deliveries of raw materials to the plant and transport of concrete mix from the plant. In each case, I do not anticipate problems at Rio Bosque Wetlands Park:

- Airborne particulates – I regularly see the materials that are stockpiled at the batch plant being sprayed to reduce potential for particulate drift. As long as that practice is continued, I foresee no significant impact to the park.

- Noise – The batch plant is within 0.25 mile of the park, and some noise associated with operation of the plant will likely be audible in the northern part of the park. It is not likely to detract from the visitor experience at the park. Daily, we hear sounds at the park associated with construction, with operation of nearby facilities such as the Roberto Bustamante Wastewater Treatment Plant, and with the nearby communities in Socorro and in Mexico. Even with this background noise, park visitors regularly comment on how quiet the park is. Most likely, the batch plant will contribute incrementally to this low level of background noise.
- Traffic – Traffic to and from the batch plant will likely be heaviest on Pan American Drive, on Winn Road, and especially on the new road and bridge linking the batch plant to the Bustamante Plant, given the construction work that will take place at the water-treatment plants over the next few years. As El Paso County Water Improvement District No. 1 continues its work concrete-lining irrigation canals in the area, that work may lead to some traffic from the batch plant on the levee road next to Rio Bosque during the periods when concrete is being applied on the canal banks. The traffic associated with this work and with other operation-and-maintenance work on the canal system has never posed a problem for the park.

I hope these comments are helpful. Feel free to contact me if you have questions.

Good morning, Ms. Urena:

It was my pleasure talking to you via phone call yesterday.

CORRIDOR 20 civic association has reviewed the proposed rezoning application for the 10002 Pan American Dr. property from the R/F zone to the M-1 zone.

CORRIDOR 20 civic association will **NOT** be in support of this rezoning application. The proposed new zoning for a Cement batch plant is inappropriate for the area. The health hazard's irreversible consequences are many. The proposed location is surrounded by residential areas in less than a mile radius, including Rio Bosque Bird Sanctuary.

The cement industry is the third largest source of industrial air pollution, such as sulfur dioxide, nitrogen oxides (NOx), silica, and carbon monoxide. Exposure to cement dust can irritate the eyes, nose, throat, and upper respiratory system. Silica exposure can lead to lung injuries, including silicosis and lung cancer. Inhaling concrete dust can cause severe and even fatal diseases such as silicosis, COPD, and lung cancer. Also, Cement dust has been shown to affect the soil ecological communities adversely. Soils surrounding cement plants, especially downward areas, exhibit elevated pH levels. Because of the cement dust's small particle size can stay in the air for up to 12 days. Sometimes, it can not be seen, but if an area smells "like concrete," cement dust circulates in the air.

The impact and implementation of this proposed cement batch plant will ultimately deteriorate the quality of life and health of all residents in the nearby neighborhoods, causing soil damage and killing the bird population.

Right now, due to the heavy semi-trailer and vehicle traffic at the Port of Entry on Zaragoza, the air pollution already exceeds healthy numbers. For all the above reasons, CORRIDOR 20 civic association will **NOT** support this health-hazardous rezoning proposal.

Thank you for your attention.

Good Afternoon,

The applicant has provided most of the required information in the notice letter.

1. The legal description for the property proposed for rezoning:

being a Portion of Tract 12B, Block 24, Socorro Grant Portion, City of El Paso, El Paso County, Texas.

2. Type of rezoning application. what is the present zoning code and what is the proposed zone code application?

The type of application is a rezoning application. The applicant is proposing to rezone the property from R-F (Ranch and Farm) to M-1 (Light Manufacturing)

However, A statement as to the application's projected impact on the

land comprising the geographic boundary of any affected recognized neighborhood associations should be provided.

Respectfully,
Nina Rodriguez

Good morning, Ms. Urena:

We acknowledge receipt of your intention to submit a rezoning application for the property located at 10002 Pan American Dr. but incomplete information was received in this case. As per Section 2.102 of the El Paso City Code, your email is missing the following required information:

1. The legal description for the property proposed for rezoning
2. Type of rezoning application. what is the present zoning code and what is the proposed zone code application?
3. A statement as to the application's projected impact on the land comprising the geographic boundary of any affected recognized neighborhood associations.

Please provide the above information for a better review of your rezoning application.

Thank you,

Best,

Fabiola Campos-Lopez,

Good Afternoon Ms. Nina, thank you for sending this ariel map information as to the location of 10002 Pan American Dr. This is clearly NOT the property we were taken to see by Mr. Jobe and he did not elaborate that the property in question was in fact, NOT the property he was showing us. This property in question cannot be allowed to rezone from R-F to M-1 for the purpose of a Concrete Plant! This area is so much closer to residential homes, and we have a bird sanctuary just next to it that would be deadly to our animal lives! The Mission Valley Civic Association will NOT be in support of the rezoning for this location or other R-F lots in question. We need to take care of the Valley!

Good Morning Ms. Carreon,
Please find the attached aerial map that highlights the subject property in light blue. The property is located east of Pan American Dr. and South of Winn Rd. I hope this helps.

Respectfully,
Nina Rodriguez

Ms. Nina, Sylvia Carreon here, again, and I just spoke with Ms. Fabiola Campos Lopez and she has clarified for me that this request to rezone from R-F to M-1 is NOT for 10002 Pan American, but for an empty lot near or around this address in question! PLEASE send me the actual address in which the rezone is being requested. The property Mr. Jobe showed us, is the property of the Water department and not his. We will have issue with this request and will deny any application of other property in question. Thank you

Good Afternoon Ms. Gina, as per our conversation today in reference to the zone change requested on this property, the Mission Valley Civic Association will have to approve the request of zone change from a R-F to M-1, for the reason is that the plant is already built on that property! Our Vice President, Marcie Carrillo and I met with Mr. Stanley Jobe, who leases that property from the El Paso Water Utilities and is already producing Concrete, not cement, to service the Bustamante Plant. We met with him on Monday June 12th and drove us around the plant explaining the process. At this point, the rezone is only verbal approval since the plant already exists! Thank you

CAUTION: This email originated from outside of the City of El Paso. Do not click links or open attachments unless you recognize the sender and know the content is safe. If suspicious, use **Phish Alert** or forward to SpamReport@elpasotexas.gov.

I would like my comments to be shared with the Planning Commission on this topic on February 8, 2024 prior to the meeting. I may be able to attend online, in which case I would like to speak to the Planning Commission during public testimony.

I am strongly opposed to Rezones 6 & 7, the cement mixing plant proposed to be located at Winn Rd & Southside Rd. This is the type of use that will have significant environmental impacts to the Rio Bosque wildlife such as noise, emissions and truck operations which would drive wildlife away and damage the plant life which can't run away.

Rio Bosque is owned and operated by the University of Texas El Paso. UTEP staff and volunteers have been working for decades to bring this area back to a condition that will support wildlife and restore water flow. It's a place to enjoy the quiet and hear the birds, watch waterfowl, and provide a refuge for people to understand the quality of life that this refuge brings.

I am opposed to this project because it will surely cause loss of property values for the nearby residents due to the noise and emissions from the plant as well as the frequent heavy truck traffic.

This cement mixing plant is a huge mistake in all these ways at a minimum.

I urge the Planning Commission to refuse to support this rezone.

Thank you,

Marilyn Guida
Resident of El Paso from June 2008 to January 2022

Please accept this as comment from the Sunset Heights Neighborhood Improvement Association and share with CPC Commissioners. Thank you.

Re Item 7

Dear Commissioners,

The Sunset Heights Neighborhood Improvement Association exists to improve Sunset Heights. We share a common interest with other neighborhood associations. Sunset Heights is built on the first hill as the valley climbs to the mountains - the river valley cutting through the mountains defines this area. A famous painting shows the valley below Sunset Heights verdant. Sadly, Rio Bosque is one tiny remnant of hundreds of square miles of rich river valley that stretched throughout what is now El Paso County. Were satellite images available then, what we now see as a mass of gray would have been a stretch of green of global significance, visible from space.

It is unconscionable that instead of growing Rio Bosque, expanding the tiny bit of green left, you are being asked to create a further mass of gray. The land is owned by the public. What better opportunity will we ever have to expand Rio Bosque?

Subject: Feb. 22nd City Plan Commission: items 6 & 7

CAUTION: This email originated from outside of the City of El Paso. Do not click links or open attachments unless you recognize the sender and know the content is safe. If suspicious, use **Phish Alert** or forward to SpamReport@elpasotexas.gov.

Hi Elsa,

I hope this email finds you well. I have a few questions (below) about Items 6 and 7 on the agenda for Thursday's CPC meeting. Could you help forward these questions to the appropriate person?

The impact of the concrete plant on people living close to the subject property and as well as the Rio Bosque is very disconcerting. This rezoning request chips away at the goals and policies set by Plan El Paso for connected open spaces. I ask that the City Plan Commission **vote to not recommend** the rezoning request.

Thank you,
Veronica Carrillo

Question 1: Items 6 and 7 contain a request to rezone 10 acres of land owned by El Paso Water to remove the zoning of "preserve" to accommodate a proposed industrial

development, specifically a permanent concrete mixing plant.

Attached is a photo of the property from Sunday, February 18th. Despite multiple references in the backup for the agenda items to the subject property as "currently vacant" land, the land has been cleared and a concrete batch plant is already set up. The picture also shows a white trailer with the Jobe company logo on it and piles of material that appear to be gravel and/or sand around the property. However, this property is currently zoned "preserve". Have any rules, laws, ordinances, codes, etc. been broken or violated by having set up this concrete batch operation on a property zoned for "preserve"?

Image removed by sender.

Question 2: Page 1 of the backup for item 7 says staff recommends imposing the following condition: "A Detailed Site Development Plan shall be reviewed and approved as per El Paso City Code before issuance of any certificates of occupancy or certificates of completion."

The two satellite images below (also [click here](#)) show that the subject property was cleared some time before May 2023.

Given that the concrete mixing plant operator has set up operations on the property before obtaining a certificate of occupancy, what rules, ordinances, codes, laws, etc. have been violated or broken?

Question 3: The TCEQ requires certain permits for concrete batch plants. Has the City of El Paso verified whether the concrete mixing plant operator has submitted applications to the TCEQ for the necessary permits?

Question 4: The negative health issues posed by concrete batch plants due to pollution such as dust and truck exhaust are well documented. There's a neighborhood in Socorro located about .23 miles from the subject property. What consideration is the City of El Paso giving to the negative health impacts the concrete batch plant will have on the people living in homes close by?

Question 5: The backup documents for the agenda items note how the proposed action complies with Plan El Paso. However, the rezoning of the subject property from "preserve" to "industrial" appears to conflict with the Habitat & Biodiversity goals and policies under the Sustainability element of the plan. Part of the vision the plan sets forth is corridors of natural habitat running throughout the city connecting open spaces, like the Rio Bosque. The rezoning of the subject property appears to cut off the Rio Bosque from connecting to other open spaces in El Paso. As the UTEP program manager for the Rio Bosque stated in the comment he submitted via email, "the Rio Bosque benefits from having biological connectivity with other areas of undeveloped open space...Each time undeveloped lands surrounding the park are cleared and developed in various ways, the value of the park as a natural area is diminished." What consideration is given to how this rezoning proposal complies with the Sustainability element of Plan El Paso?

(The sustainability section of Plan El Paso is attached. [Click here](#) to view volume 2 of the Plan that contains the section for this element. See page 10.27)

I am Ed Talamantes and I live in the Mission Valley. I strongly oppose the plan to build a Cement Batch Plant in the area of the Rio Bosque Bird Sanctuary. Our area is being inundated with industries that negatively impact the health and safety of our area, not to mention the harm to the environment. I hope the city and Batch Plant backers find a location that would be more suitable and respect the opposition of the affected public and environment.

Greetings:

I am contacting you joining along with other concerned citizens in the Mission Valley to express my vigorous opposition to the proposed application for a cement batch plant to be discussed under item #6 PLCP 24-00001 at the City Planning Commission meeting on Thursday, February 22nd.

The proposed location of the cement plant next to a residential area and a wildlife preserve is, to say the least, a very poor idea and will have a harshly negative impact on the region's environment, with increased pollution and traffic safety concerns. These concerns should be readily apparent to anyone who has any concerns for the

needs of the community.

All too often, the legitimate issues raised by the residents of the Mission Valley have been totally ignored because of special interest agendas. Please ask yourself, would you be willing to welcome, encourage, and work for the establishment of a cement batch plant next to your neighborhood?

If your answer is no, you can understand the reason why the residents next to the proposed cement plant location are concerned about this issue. Please take their fears into serious consideration and do whatever you can to deny this ill-considered application.

Respectfully,

Jose R. Torres, Vice President
Pueblo Viejo Neighborhood Association

Dear Planning and Zoning Commission,

Our El Paso Group of the Sierra Club is very concerned about the proposed rezoning of these 10 acres and approval of a concrete plant. We are also astonished that Jobe has already cleared and moved equipment onto an unapproved site. Certainly this is illegal. We will be investigating this.

Concrete plants are notorious polluters and Socorro residents will be affected. We call this environmental racism, degrading air quality of citizens living in low-lying areas by those who live high above the city. The proposed rezoning will also have the effect of opening up an industrial area where farming and ranching are now in place.

Jobe has a long history of impacting residential areas. Not so long ago it was the neighborhood and schools in Northeast below McKelligon Canyon. We breathed a sigh of relief (literally) when he sold out. Unfortunately, the folks in Socorro are not as well organized or as well-heeled. It is up to you folks on the commission to protect their quality of life. There is no reason other than convenience and cost that Mr. Jobe cannot move his operation further out of town. He will still make plenty of profit.

Good morning. Please see updated comment. Thank you!

Re Item 6 and 7

Dear Commissioners,

I understand the need for materials for the EPW plant development, and the nature of the rapidly growing industrial area clustered around the ports. However, Item 6 notes that the area under consideration is part of a broader designation under Plan El Paso. The City, the PSB, and the City of Socorro, which has Cougar Park nearby, should we working together to expand Rio Bosque into a major regional attraction and living laboratory. Its location next to the sewage plants makes it an ideal location for scientific study into wetland filtration.

Zaragoza is a reality, and while there are significant efforts to improve its efficiency in and around the port, they have been focused on the economic development. That is critical, but so is community quality of life, and the remnants of natural environment

that once filled the River Valley from The Pass down to the County Line. The overriding effort in this area directly to the south of the port should be to cluster the industrial uses closer together, and increase the open space, as opposed to the other way around.

I realize those are larger policy considerations, and you may be counseled that they have no place in the discussion about Items 6 and 7. Your purview may be limited. Fair enough! If that is the case, then simply stick to Plan El Paso, and vote no on Item 6.

PS: Altering Plan El Paso for spot zoning is a form of policy. We've just been doing that for so long it doesn't register. Please vote against both Items 6 and 7. If you are allowed to submit comments to the City Council, please recommend that they work with the applicants, public and private, to move the facility further from residents and Rio Bosque.

On Wed, Feb 7, 2024 at 3:52 PM Sito <sito.negron@gmail.com> wrote:

Please accept this as comment from the Sunset Heights Neighborhood Improvement Association and share with CPC Commissioners. Thank you.

Re Item 7

Dear Commissioners,

The Sunset Heights Neighborhood Improvement Association exists to improve Sunset Heights. We share a common interest with other neighborhood associations. Sunset Heights is built on the first hill as the valley climbs to the mountains - the river valley cutting through the mountains defines this area. A famous painting shows the valley below Sunset Heights verdant. Sadly, Rio Bosque is one tiny remnant of hundreds of square miles of rich river valley that stretched throughout what is now El Paso County. Were satellite images available then, what we now see as a mass of gray would have been a stretch of green of global significance, visible from space.

It is unconscionable that instead of growing Rio Bosque, expanding the tiny bit of green left, you are being asked to create a further mass of gray. The land is owned by the public. What better opportunity will we ever have to expand Rio Bosque?

The utility understands the value of green space - it recently invested millions to develop a water capturing arroyo in what most presume will in the near future be new development in the Northeast. If we can do it there we can do it in the Valley. Don't put further industrial burdens on Valley residents. Please do not allow this zoning change, and instead request that the utility explore ways to turn that property over to Rio Bosque's stewards.

Hello Mr. Jobe:

Thank you for your quick response and attention to the concerns of Mission Valley residents regarding the proposed location of the cement batch plant. Apparently, these concerns regarding the safety and pollution issues regarding cement batch plants are nothing new. If you google "cement batch plant" you will find a general consensus opinion that you don't want to live near a cement batch plant.

You are probably aware of some of these concerns: the health danger posed from the particulate matter (dust) produced by the plant, considered to be one of the deadliest forms of air pollution and one that has been linked to higher rates of asthma, heart disease, bronchitis, and cancer, the contribution to air pollution from the long idling of semis waiting to load the concrete, and the contribution to reduced lung development in children.

Mr. Jobe, have you and your staff considered and addressed any of these concerns, and have you come up with possible solutions to answer these concerns? I hope you have and that you will address these fears at tomorrow's meeting to the satisfaction of everyone concerned.

Mr. Jobe, you have contributed a great deal to our community. We're not saying you are a "bad person." We know you are not. El Paso and Jobe Concrete are a great team and I hope you consider everyone who lives here your neighbor. If so, ask yourself, "Would I deliberately do something that I knew could possibly hurt or harm my next-door neighbor or the neighbors around me?" I think your answer would be no.

Please reconsider your applications. I'm sure a more residential and environmentally friendly location can be found. Thank you again for considering our position and concerns.

Respectfully,

Jose R. Torres, Vice President

I request that the following comments be read during public comment for the referenced items.

Commissioners and concerned individuals:

My name is Deborah Torres and I am a resident of the Mission Valley and secretary of the Pueblo Viejo Neighborhood Association. I am **strongly opposed** to the approval of the referenced items #6 and 7 for the

following reasons:

1) Negative health impact to neighboring residents-
Findings by the Environmental Protection Agency indicate that particulate matter released by these plants can cause asthma, throat cancer, cardiac arrest and bronchitis.

2) Negative environmental impact to the Rio Bosque preserve and wildlife

3) The presence of yet another industrial entity in the Mission Valley will disrupt and compromise the Mission Valley's aesthetics and historic value.

The only foreseeable benefit in approving the rezoning request is financial for the Jobe Concrete Company.

Please vote again Items 6 and 7.

Best,

Deborah Torres

Hi, please accept my comment for item 6 below. It is also attached as a PDF.

Dear City Plan Commissioners,

I am reaching out to respectfully voice my opposition to agenda items 6 and 7 scheduled for discussion at the upcoming CPC meeting on February 22, 2024. While I recognize the importance of economic development, I firmly believe in the necessity of safeguarding our community's health and quality of life.

Item 6 proposes a significant deviation from the City's master plan, Plan El Paso, by seeking to alter the designated future land use of a specific property from "Preserve" to "Industrial". Item 6 challenges the integrity of Plan El Paso..

Figure 1: Future land use map according to Plan El Paso

Furthermore, as depicted in Figure 2, the current guidelines recommend clustering industrial properties around the Zaragoza port of entry, with a clear boundary at the Franklin Spur Drain. Extending industrial zoning into areas earmarked for preservation disrupts this strategic planning.

Figure 2: Future land use map according to Plan El Paso.

The timing of these proposed changes is particularly concerning, given the City's initiation of Envision El Paso, an effort to update the Plan El Paso. This effort is at risk of being undermined if the commitments made in Plan El Paso are not upheld. The decisions made regarding items 6 and 7 will send a potent message to our community about the value of their contributions and the future direction of our city.

The backup for item 7 notes that waste water from the concrete mixing plant will be

collected in a ponding area on the subject property. With the subject property being only .13 miles from the Rio Bosque this raises questions about contaminating the wetlands. Wildlife that may find their way into the ponding area will carry contaminants within them into the Rio Bosque. Moreover, the juxtaposition of such an industrial operation alongside water treatment facilities invites further scrutiny. What are the consequences of placing a concrete mixing plant next to a water treatment plant and the future site of a water purification plant?

It begs the question: why pursue rezoning when alternative sites, already zoned for light manufacturing and situated within the industrial zone near Zaragoza, exist and are owned by the City of El Paso/El Paso Water? These locations are not only more suitable but also positioned further from residential areas, thereby aligning better with Plan El Paso's vision for sustainable development.

The consideration of land values and the potential for higher returns on city-owned properties underscores the opportunity for more prudent fiscal stewardship.

-
-
- The 100-acre parcel of land directly adjacent to the west of the subject property was
- zoned for ranch/farm. It was rezoned in 1992 from ranch/farm to light manufacturing. This land too should be zoned "preserve" yet it's curious that this is not the potential site for the concrete mixing plant as it is already zoned for light manufacturing.
- This parcel is valued at \$4M.
-
-
-
- Properties within the industrial area, that are owned by the City of El Paso or El Paso
- Water/Public Service Board, are valued at about \$600k - \$800k for 10 acres, about the same size and shape as the subject property. The subject property is 10 acres and is located within a 30 acre parcel of land valued at just over \$106k. (Note that the parcels
- in the industrial area are farther away from people's homes.)
-

Selling land already zoned for industrial purposes, particularly in areas with higher valuation in the industrial area, would serve the City's financial interests while preserving our commitment to environmental and community health.

I urge the Commission to consider the long-term implications of these rezoning proposals, not just for El Paso's urban landscape but for the health and well-being of our community. Thank you for your thoughtful consideration of these concerns.

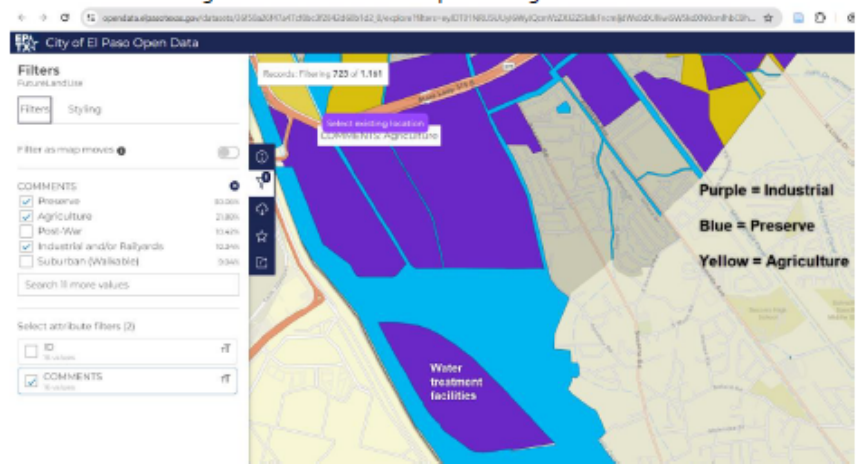

Sincerely,
Veronica Carrillo

Dear City Plan Commissioners,

I am reaching out to respectfully voice my opposition to agenda items 6 and 7 scheduled for discussion at the upcoming CPC meeting on February 22, 2024. While I recognize the importance of economic development, I firmly believe in the necessity of safeguarding our community's health and quality of life.

Item 6 proposes a significant deviation from the City's master plan, Plan El Paso, by seeking to alter the designated future land use of a specific property from "Preserve" to "Industrial". Item 6 challenges the integrity of Plan El Paso.

Figure 1: Future land use map according to Plan El Paso

Furthermore, [as depicted in Figure 2](#), the current guidelines recommend clustering industrial properties around the Zaragoza port of entry, with a clear boundary at the Franklin Spur Drain. Extending industrial zoning into areas earmarked for preservation disrupts this strategic planning.

Figure 2: Future land use map according to Plan El Paso.

The timing of these proposed changes is particularly concerning, given the City's initiation of Envision El Paso, an effort to update the Plan El Paso. This effort is at risk of being undermined if the commitments made in Plan El Paso are not upheld. The decisions made regarding items 6 and 7 will send a potent message to our community about the value of their contributions and the future direction of our city.

The backup for item 7 notes that wastewater from the concrete mixing plant will be collected in a ponding area on the subject property. With the subject property being only .13 miles from the Rio Bosque this raises questions about contaminating the wetlands. Wildlife that may find their way into the ponding area will carry contamination with them into the Rio Bosque. Moreover, the juxtaposition of such an industrial operation alongside water treatment facilities invites further scrutiny. What are the consequences of placing a concrete mixing plant next to a water treatment plant and the future site of a [water purification plant](#)?

It begs the question: why pursue rezoning when alternative sites, already zoned for light manufacturing and situated within the industrial zone near Zaragoza, exist and are owned by the City of El Paso/El Paso Water? These locations are not only more suitable but also positioned further from residential areas, thereby aligning better with Plan El Paso's vision for sustainable development.

The consideration of land values and the potential for higher returns on city-owned properties underscores the opportunity for more prudent fiscal stewardship.

- The 100-acre parcel of land directly adjacent to the west of the subject property was zoned for ranch/farm. It was rezoned in 1992 from ranch/farm to light manufacturing. This land too should be zoned "preserve" in keeping with Plan El Paso, yet, curiously, this is not the potential site for the concrete mixing plant as it is already zoned for light manufacturing. This 100-acre parcel is valued at \$4M.
- Properties within the industrial area, that are owned by the City of El Paso or El Paso Water/Public Service Board, are valued around \$600k - \$800k. For example, a 19-acre parcel (geo ID R61099900100100) is valued at about \$802k. The subject property is 10 acres and is located within a 30-acre parcel of land valued at just over \$106k. (Note that the parcels in the industrial area are farther away from people's homes.)

Selling land already zoned for industrial purposes, particularly in areas with higher valuation in the industrial area, would serve the City's financial interests while preserving our commitment to environmental and community health.

I urge the Commission to consider the long-term implications of these rezoning proposals, not just for El Paso's urban landscape but for the health and well-being of our community. Thank you for your thoughtful consideration of these concerns.

Dear Ms. Carreon,

Please see the correspondence below we received from the city to our engineer and our engineer's response. The property I showed you in person **IS** the property we are requesting the zoning. We do not own or lease any other property in that area and the property we are trying to get zoned belongs to the PSB. As you saw we currently have a concrete plant on the site that is servicing the Bustamante Plant expansion. In fact, we had a large concrete placement there last night. Please send me the map the city sent you as it must not be correct. The attachment above shows the original photo we provided in the zoning request. The Google earth is not up to date and does not show the plant, the new Bustamante plant road and the bridge across the canal that is now on this site.

As I explained to you at our visit we cannot meet the specifications on delivery of concrete to the Bustamante plant from other locations. We are allowed to furnish concrete to the Bustamante Expansion that will probably last 5 to 6 years and we further want to supply concrete to other jobs that cannot be serviced from other locations from this location. In order to do that we need to get the zoning changed. All the PSB land to the south is zoned M-1 and our proposed use would be in line with every other current use in the area.

Please call me if you wish to re-visit the site or need any other information. I am glad to provide any further explanations.

Thank-you,

Stanley

Andres, if needed, please respond to the Neighborhood association as follows:

1. Please see attached aerial photo we provided to the rezoning sign company that is installing the sign today- placed closest to the levee road and outside of the existing batch plant chain-link fence so that people driving along Pan American road or using the levee road can see the sign. As you can see from the aerial – this site is over 1,000 feet from any resident.
2. If needed, Ralph and Stanley would be more than glad to show them the site again with you all as well so that way there are no questions about where this site.

Good Afternoon Ms. Nina, thank you for sending this ariel map information as to the location of 10002 Pan American Dr. This is clearly NOT the property we were taken to see by Mr. Jobe and he did not elaborate that the property in question was in fact, NOT the property he was showing us. This property in question cannot be allowed to rezone from R-F to M-1 for the purpose of a Concrete Plant! This area is so much closer to residential homes, and we have a bird sanctuary just next to it that would be deadly to our animal lives! The Mission Valley Civic Association will NOT be in support of the rezoning for this location or other R-F lots in question. We need to take care of the Valley!

Ms. Nina, Sylvia Carreon here, again, and I just spoke with Ms. Fabiola Campos Lopez and she has clarified for me that this request to rezone from R-F to M-1 is NOT for 10002 Pan American, but for an empty lot near or around this address in question! PLEASE send me the actual address in which the rezoning is being requested. The property Mr. Jobe showed us, is the property of the Water department and not his. We will have issue with this request and will deny any application of other property in question. Thank you

Good Afternoon Ms. Gina, as per our conversation today in reference to the zone change requested on this property, the Mission Valley Civic Association will have to approve the request of zone change from a R-F to M-1, for the reason is that the plant is already built on that property! Our Vice President, Marcie Carrillo and I met with Mr. Stanley Jobe, who leases that property from the El Paso Water Utilities and is already producing Concrete, not cement, to service the Bustamante Plant. We met with him on Monday June 12th and drove us around

the plant explaining the process. At this point, the rezone is only verbal approval since the plant already exists! Thank you

Ms. Rodriguez, I went ahead and downloaded the item in question as I have truly searched my documents and can not find, sorry to say, this item in particular. It appears that Ms. Campos had done extensive research on this matter and must agree with her decision as well to deny this rezone for the purpose of the Concrete Batch PLANT! Thank you

Subject: RE: 10002 Pan American Dr.

Good afternoon Ms. Carreon,

I did receive notification that you were informed of this rezoning application, please see the attached email. Are you sure your denial for the rezoning request is for 10002 Pan American Dr. or is it meant for 9614 Socorro? I would just like to clarify to ensure we have the correct comments for correct case.

Respectfully,
Nina Rodriguez

This is Sylvia Carreon, president of the Mission Valley Civic Association and be advised that we never received any letter of notification as did the Corridor 20 Civic Association. I have researched all my documents and have not received this notification. As such, we would also agree with Ms. Campos with the Corridor 20 Association and vote to DENY this request! Thank you

Subject: Zoning on Pan American

Dear Ms. Guida,

I understand you are against our proposal to zone a parcel located at 10002 Pan American Drive. The City Plan Commission forwarded a copy of your email to our Engineer of Record that you sent to Ms. Ramirez and Mr. Smith with the City Planning department.

I would like to meet with you either on the site, at the City offices or at a location of your choice to discuss our zoning proposal. I will not be confrontational and only informative. I respect your opinion to oppose this zoning request but perhaps once you see what we propose and what the

property has been used for in the past you may change your mind or at least be more comfortable with the proposed use.

You can reach me by email stanley@jobeco.com or my office 915-298-9900 or my cell phone 915-478-2301.

I hope that we can meet.

Best regards,

Stanley Jobe

Greetings:

I am contacting you joining along with other concerned citizens in the Mission Valley to express my vigorous opposition to the proposed application for a cement batch plant to be discussed under item #6 PLCP 24-00001 at the City Planning Commission meeting on Thursday, February 22nd.

The proposed location of the cement plant next to a residential area and a wildlife preserve is, to say the least, a very poor idea and will have a harshly negative impact on the region's environment, with increased pollution and traffic safety concerns. These concerns should be readily apparent to anyone who has any concerns for the needs of the community.

All too often, the legitimate issues raised by the residents of the Mission Valley have been totally ignored because of special interest agendas. Please ask yourself, would you be willing to welcome, encourage, and work for the establishment of a cement batch plant next to your neighborhood?

If your answer is no, you can understand the reason why the residents next to the proposed cement plant location are concerned about this issue. Please take their fears into serious consideration and do whatever you can to deny this ill-considered application.

Respectfully,

Jose R. Torres, Vice President

Dear Mr. Gibson,

I am in receipt of your letter of opposition below. I would be glad to discuss our rezoning application with you. I respect your opinion, however please allow me to correct the record on some of your statements regarding me, my company and the site.

We had permission to set up a concrete mixing plant at this site to service the Public Works Project at the Bustamante Sewer Plant. We have been operating there several months only for this project. We are legal in our current use.

Farming and Ranching have not been practiced at our concrete mixing plant site for more than 30 years. We are right next door to a sewer plant and I don't see how that is environmental racism. We have a properly permitted plant with the TCEQ.

I have not owned the McKelligon Canyon Quarry since 1999. I sold it originally to RMC, a London based company who operated under the Jobe company name until 2005. RMC sold it to CEMEX, a multinational firm headquartered in Monterrey, Mexico in early 2005. CEMEX sold it to GCC Sun City Materials, LLC in early 2015. The parent company is GCC headquartered in Chihuahua City, Mexico. The McKelligon Quarry is still operating today and most likely at a higher capacity given the growth of the community than when I owned and operated it.

The reason we cannot move out of town is that wet concrete has a shelf life by project specifications and the building code. Once water is introduced to the mixture of sand, gravel and cement the concrete mixture must be placed in 1 to 1.5 hours. We cannot make the specifications required at the Bustamante Plant from other locations in town. Currently there are more than 20 concrete mixing plants in the El Paso area scattered out across the city.

The site of the proposed concrete mixing plant zone request is right across the street from an industrial park already zoned M-1. The parcel directly adjacent to our concrete mixing plant site is zoned M-1. In order for us to service other jobs that are not public works projects we need a zoning change.

My cell number is 915-478-2301 or my office is 915-298-9900.

I would be glad to hear from you if you have any questions.

Best regards,

Stanley Jobe

Dear Planning and Zoning Commission,

Our El Paso Group of the Sierra Club is very concerned about the proposed rezoning of these 10 acres and approval of a concrete plant. We are also astonished that Jobe has already cleared and moved equipment onto an unapproved site. Certainly this is illegal. We will be investigating this.

Concrete plants are notorious polluters and Socorro residents will be affected. We call this environmental racism, degrading air quality of citizens living in low-lying areas by those who live high above the city. The proposed rezoning will also have the effect of opening up an industrial area where farming and ranching are now in place.

Jobe has a long history of impacting residential areas. Not so long ago it was the neighborhood and schools in Northeast below McKelligon Canyon. We breathed a sigh of relief (literally) when he sold out. Unfortunately, the folks in Socorro are not as well organized or as well-heeled. It is up to you folks on the commission to protect their quality of life. There is no reason other than convenience and cost that Mr. Jobe cannot move his operation further out of town. He will still make plenty of profit.

I represent over 500 Sierra Club members in the El Paso area. Please consider the people of Socorro.

Thank you,
Laurence Gibson, chair
El Paso Sierra Club

Dear Ms. Guida,

Since you don't live in El Paso anymore and cannot meet in person, I am attaching several maps and will talk about each one below. I also have further comments and points after I explain the maps:

1. The first PDF attached is marked "June 2022-Pan American Mixing Plant Site". This map shows a historical Google picture of the site in June of 2022 before we moved on the site we leased from the El Paso Water Utilities in 2023. It was bare land that had been cleared many years ago before we leased it from the El Paso Water Utilities. We moved on the site around April or May of 2023 and erected a concrete mixing plant to serve ready mix concrete for the Bustamante Sewage Treatment Plant owned by the El Paso Water Utilities. The Bustamante Project is expected to last 5 or 6 years. The leased site is shown in checkered black with a Jobe Logo on the map.
2. The second PDF attached is marked "Pan AM Print-05". This picture was taken in October of last year. This picture shows the plant fully erected and functional. It shows the new road that the El Paso Water Utilities had built along with a new bridge across the canal to better service the Bustamante Sewer Plant. The new road is the extension of Pan American Drive. To date we have had no complaints from neighboring property owners about our operations supplying the Bustamante Sewer Plant.
3. The third PDF attached is marked "PanAm Print-03". This picture shows the current zoning in the area which is M-1C, M-2SP and R-F.
4. The fourth PDF attached is marked "Pan-Am Print-04". This map shows distances to the closest residents and the Rio Bosque area. All distances are very substantial.

Below are the points I hope will convince you that our use is a proper use for the area and will not impact the Rio Bosque or anyone else.

1. The site is right next door to a sewer plant and water treatment plant.
2. The site is completely self-contained and there is no drain or processed water that can escape from the property.
3. The site is south of a large drain ditch owned by the El Paso Water and Improvement District Number One to the northeast that buffers it from other uses. This drain ditch will always be used by the EPWID#1.
4. The Zoning is appropriate with the rest of the area. R-F is used as a holding zone in most cases. The land has not been used for any farming in 30 or more years.
5. The site was cleared years ago. It was bare dirt before we occupied it and it has never been used for the Rio Bosque or ever could be used for the Rio Bosque.
6. A concrete mixing plant is needed for the area.
7. Concrete mixing plants do not produce cement which is a common misconception. The function of a concrete mixing plant is to mix cement (that we buy), sand, gravel and water much like a mixing bowl. A concrete mixing plant mixes the ingredients above which makes wet ready mix concrete that is delivered in a mixer truck. Cement is produced in large manufacturing plants that have kilns and grinders. There are no cement plants in El Paso County but there are more than 25 concrete mixing plants.
8. Ready mix concrete has a shelf life of about one hour to 1.5 hours after mixing or it will not be suitable or meet specifications.

In general:

We put this plant on the location and leased the land from the El Paso Water Utilities to service the Bustamante Sewer Plant because the specifications for the job are such that the concrete needed for the plant cannot be produced by a plant further away. The Bustamante Sewer Plant job will last 5 years or more. The traffic in this area is horrendous with the cross border traffic. We only use Pan American, Carl Longuemare Rd. and Winn Road to the south and west of Carl Longuemare which are industrial streets to access this property. We will not go east on Winn Road through any residential neighborhood to access this site. The only time we would use Winn Road to the east is if there was a delivery for ready mix concrete to a home owner on that street or in the area that could not be accessed any other way.

There is an important need for ready mix concrete in the Pan American Industrial Park, Zaragosa Port of Entry and to jobs along the Border Highway that cannot be serviced by other locations due to the traffic congestion. In order to service jobs other than the Bustamante Sewer Plant we need a zoning change, which is the reason for our application with the City.

Concrete mixing plants are necessary for the development of El Paso. Private citizens and public

agencies cannot build houses, commercial buildings, roads or infrastructure without concrete mixing plants. Ready mix concrete has a shelf life because once cement comes in contact with water and is mixed with aggregates the concrete mix starts to hydrate which makes the concrete harden. There is a limited time to place the concrete at its final location before it sets up and cannot be properly placed or finished. Concrete mixing plants must be placed strategically all over the metropolitan area in order to adhere to the specifications that are set out in building codes and specific project plans. One location for concrete mixing plants to service all areas of our city, or any other city, will not meet specifications or the practicality of producing, placing and finishing wet concrete.

When I chose this site to lease from the El Paso Water Utilities I thought it was the perfect site. It was next to a sewer and a water treatment plant and in a known industrial area. The land all around the plant is planned for heavy industrial use. The site was perfect from a traffic standpoint as it will not affect any residential or even light commercial area. The surrounding businesses all utilize heavy trucks. A concrete mixing plant is desperately needed in this area as it is increasingly difficult, due to the traffic on and around Loop 375, to provide concrete that meets specifications in the Pan American Industrial Park that is present and planned. Further, there will be expansions to the Zaragosa Port of Entry that will not be able to be serviced by concrete mixing plants further away.

It is my hope given these facts you will withdraw your opposition to this rezoning application and write to the CPC your withdrawal of opposition. If you would like to call me, I will answer any questions you may have. My cell is 915-478-2301 or my office is 915-298-9900.

Best regards,

Stanley Jobe

Dear Sito,

In anticipation of our meeting next week I wanted to send you something to go over. Please see below:

1. The first PDF attached is marked "June 2022-Pan American Mixing Plant Site". This map shows a historical Google picture of the site in June of 2022 before we moved on the site we leased from the El Paso Water Utilities in 2023. It was bare land that had been cleared many years ago before we leased it from the El Paso Water Utilities. We moved on the site around April or May of 2023 and erected a concrete mixing plant to serve ready mix concrete for the Bustamante Sewage Treatment Plant owned by the El Paso Water Utilities. The Bustamante Project is expected to last 5 or 6 years. The leased site is shown in checkered black with a Jobe Logo on the map.
2. The second PDF attached is marked "Pan AM Print-05". This picture was taken in October of last year. This picture shows the plant fully erected and functional. It shows the new road that the El Paso Water Utilities had built along with a new bridge across the canal to better service the Bustamante Sewer Plant. The new road is the extension of Pan American Drive. To date we have had no complaints from neighboring property owners about our operations supplying the Bustamante Sewer Plant.
3. The third PDF attached is marked "PanAm Print-03". This picture shows the current zoning in the area which is M-1C, M-2SP and R-F.
4. The fourth PDF attached is marked "Pan-Am Print-04". This map shows distances to the closest residents and the Rio Bosque area. All distances are very substantial.

Below are the points I hope will convince you that our use is a proper use for the area and will not impact the Rio Bosque or anyone else.

1. The site is right next door to a sewer plant and water treatment plant.
2. The site is completely self-contained and there is no drain or processed water that can escape from the property.
3. The site is south of a large drain ditch owned by the El Paso Water and Improvement District Number One to the northeast that buffers it from other uses. This drain ditch will always be used by the EPWID#1.
4. The Zoning is appropriate with the rest of the area. R-F is used as a holding zone in most cases. The land has not been used for any farming in 30 or more years.
5. The site was cleared years ago. It was bare dirt before we occupied it and it has never been used for the Rio Bosque or ever could be used for the Rio Bosque.
6. A concrete mixing plant is needed for the area.
7. Concrete mixing plants do not produce cement which is a common misconception. The function of a concrete mixing plant is to mix cement (that we buy), sand, gravel and water much like a mixing bowl. A concrete mixing plant mixes the ingredients above which makes wet ready mix concrete that is delivered in a mixer truck. Cement is produced in large manufacturing plants that have kilns and grinders. There are no cement plants in El Paso County but there are more than 25 concrete mixing plants.
8. Ready mix concrete has a shelf life of about one hour to 1.5 hours after mixing or it will not be suitable or meet specifications.

In general:

We put this plant on the location and leased the land from the El Paso Water Utilities to service the Bustamante Sewer Plant because the specifications for the job are such that the concrete needed for the plant cannot be produced by a plant further away. The Bustamante Sewer Plant job will last 5 years or more. The traffic in this area is horrendous with the cross border traffic. We only use Pan American, Carl Longuemare Rd. and Winn Road to the south and west of Carl Longuemare which are industrial streets to access this property. We will not go east on Winn Road through any residential neighborhood to access this site. The only time we would use Winn Road to the east is if there was a delivery for ready mix concrete to a home owner on that street or in the area that could not be accessed any other way.

There is an important need for ready mix concrete in the Pan American Industrial Park, Zaragosa Port of Entry and to jobs along the Border Highway that cannot be serviced by other locations due to the traffic congestion. In order to service jobs other than the Bustamante Sewer Plant we need a zoning change, which is the reason for our application with the City.

Concrete mixing plants are necessary for the development of El Paso. Private citizens and public agencies cannot build houses, commercial buildings, roads or infrastructure without concrete mixing plants. Ready mix concrete has a shelf life because once cement comes in contact with water and is mixed with aggregates the concrete mix starts to hydrate which makes the concrete harden. There is a limited time to place the concrete at its final location before it sets up and cannot be properly placed or finished. Concrete mixing plants must be placed strategically all over the metropolitan area in order to adhere to the specifications that are set out in building codes and specific project plans. One location for concrete mixing plants to service all areas of our city, or any other city, will not meet specifications or the practicality of producing, placing and finishing wet concrete.

When I chose this site to lease from the El Paso Water Utilities I thought it was the perfect site. It was next to a sewer and a water treatment plant and in a known industrial area. The land all around the plant is planned for heavy industrial use. The site was perfect from a traffic standpoint as it will not affect any residential or even light commercial area. The surrounding businesses all utilize heavy trucks. A concrete mixing plant is desperately needed in this area as it is increasingly difficult, due to the traffic on and around Loop 375, to provide concrete that meets specifications in the Pan American Industrial Park that is present and planned. Further, there will be expansions to the Zaragoza Port of Entry that will not be able to be serviced by concrete mixing plants further away.

It is my hope given these facts you will withdraw your opposition to this rezoning application and write to the CPC your withdrawal of opposition. I look forward to seeing you next week. Give me a call when you can meet. I can either meet you at the zoning site or downtown. We have a small loft at 215 N. Stanton in the Martin Building where we could meet. Let me know.

Best regards,

Stanley Jobe

Dear Ms. Carrillo,

I am in receipt of your opposition to our rezoning application. I would be glad to discuss this with you and answer any questions or concerns. The hearing is tomorrow and if you want to talk, I am available the rest of today. I have a commitment early tomorrow and will not be able to talk on the phone but I will be at the City Plan Commission tomorrow. My cell is 915-478-2301 or my office is 915-298-9900.

Best regards,

Stanley Jobe

Good Afternoon Mission Valley Area Neighborhood Associations,

I hope this email finds you well. I am Marcie Carrillo Mission Valley Planning representative.

I am writing this email to ask for your help to **OPPOSE** a proposed cement plant in our area.

The intended application plans to set up a Cement Batch Plant permanently in a lot close to a residential area and the Rio Bosque Bird Sanctuary. We the Mission Valley neighborhood associations, should stay united and strong to protect the health and environment of our community, animals, and our soil.

So I ask you please call to **OPPOSE** this item. The Planning Commission meeting is to take place this

Thursday, February 22nd at 1:30 pm

Item #6 PLCP 24-00001

You may call using the following phone numbers:

(915) 213-4096 or toll free 1(833)664-9267 CONFERENCE ID# 360 855 497#

Email: ramirezez@elpasotexas.gov

If you have any questions please feel free to contact me.

Thank you for your time and support.

Marcie Carrillo

EPNC Mission Valley Planning Area Representative

(915) 702-8699
