BACKGROUND / DISCUSSION:

The voters of the City of El Paso approved a Public Safety Bond measure in November 2019. Key elements of the bond program are new and/or renovated public safety facilities. One of those is a new fire station to accommodate special operations functions including the following:

- Technical Rescue: responds to technical rescue incidents, involving high-angle, trenches and confined spaces.
- Hazardous Materials: responds to hazardous materials releases, weapons of mass destruction events and other hazardous conditions.
- Combined Search and Rescue and Water Rescue responds to mountain/ wilderness search and rescue and incidents at the refinery and water rescue including swift water rescue, open water and advanced open water scuba rescues.

These functions are currently housed in three locations: Fire Stations 1, 9, and 11. The fire department will realize significant operational efficiencies by consolidating them into one location. That location will be a Special Units Station to be located at the site of the Tillman Health Center at 222 S. Campbell St. in downtown El Paso. The Tillman Building is vacant and no longer used by the City and is known to present asbestos health risks to occupants. It will be demolished to make way for the new station.

SELECTION SUMMARY:

Solicitation was advertised on March 9, 2021. Twelve (12) firms submitted Statements of Qualification, nine of which are local. The successful offeror is local and has performed well in previous engagements with the City.

Mr. Jerry DeMuro, PMP Assistant Director of Design Capital Improvement Department City of El Paso 218 N. Campbell, 2nd Floor El Paso, Texas 79901

Reference: El Paso Fire Department Special Operations Division Station **REVISED proposal**

Dear Mr. DeMuro,

We sincerely appreciate this opportunity to offer the services of our firm as Architects for the above referenced project.

In addition to the Scope of Work defined in the REQUEST FOR STATEMENTS OF QUALIFICATION, per our video conference of June 8, 2021, we further understand the basic Project Scope to be as follows:

- 1. The site is the current site of the Tillman Health Center building at 222 S. Campbell.
- 2. The estimated gross area of the new Station is 20,000 sf.
- 3. Due to the constraints of the site, the station will likely be a two-story building.
- 4. The station is to house 10 apparatus, storage, fitness facility, living and sleeping quarters, and a public meeting room.
- 5. Secure parking for occupants of the station
- 6. Demolition of the current Central Fire Station will take place after completion of the new station; demolition of the existing fire station is not a part of the scope of this project.
- 7. The project is to be designed to meet Green Globes (two globes) requirements, however, formal submittal for certification will not be made to Green Globes.
- 8. The services of a fire protection engineer are not required; performance specifications will be prepared by the design team, for use by the contractor in developing the design and shop drawings.
- 9. An on-site representative during construction is not required of the design team.
- 10. Ten (10) paper plan sets are not required after the bid opening; all documents will be transmitted electronically to Capital Improvements Department.
- 11. The construction delivery method has not been determined.

Due to the current construction climate, we preliminarily estimate the construction cost of the subject project to be \$11,000,000.00.

We are pleased to present a fee proposal as listed below, outlined per the various services requested.

Mr. Jerry DeMuro El Paso Fire Department Special Operations Division Station Mijares Mora Architects, Inc. July 1, 2021

The Pre-Design Phase is the programming phase during which we will define the project requirements. The efforts will include meetings with the stakeholders to gather information which will lead to establishment of the required spaces, occupancy/use/function, sizes, required relationships to each other, furnishings and equipment of the facility. Traffic and circulation requirements within the facility and site will be established. A tabulation of the net areas and probable gross building area will be calculated.

Fees required for plan review and permitting for construction by respective jurisdiction are **not** included in our proposal.

In summary, we respectfully propose a total lump sum fee of \$1,017,482.00.

In addition, we respectfully propose the following breakdown of the Basic Services fee, for invoicing purposes, as follows:

Schematic Design Phase	15%
Design Development Phase	25%
Final Design Phase	35%
Bidding/negotiation	05%
Contract Administration (construction)	20%

Services such as the survey, geotechnical report, and cost estimate, will be invoiced upon their respective completion.

We hope you find the proposal in order. Should you have any questions, or comments, or should you require any additional information, please let us know.

Thank you for your consideration.

Respectfully submitted,

limited to, the Texas Department of Transportation and the U.S. Department of Interior, Bureau of Reclamation, as needed to complete the proper design. This does not, however, include property surveys and legal descriptions as needed to acquire additional right-ofway or additional property.

- **3.** Obtain all available horizontal and vertical locations of public utilities, and fully coordinate design of the Project with public utilities in an effort to minimize relocation of utilities as much as possible.
- 4. Make drawings from field measurements of existing construction when required for planning additions or alterations thereto.
- 5. Provide consultation and advice as to the necessity of providing or obtaining other services such as the types described herein, and act as the Owner's representative in connection with any such services, and if concurred with and authorized by the Owner, provide, procure, or assist in procuring such Additional Services.
- 6. Review with the Owner alternative approaches in regard to the construction of the Project. The Owner at its option may designate in writing various construction contracts into which the Project shall be divided. The Consultant may request additional reasonable compensation if the Owner designates various construction contracts into which the Project is to be divided. The Consultant shall thereafter treat each construction contract as a separate Project under this Agreement. Each construction contract shall be separately bid and the Consultant shall prepare separate preliminary design, pre-final design, and final design specifications, proposal forms, notices to bidders, construction contract documents, and other required documents for each construction contract.
- 7. Prepare for approval by the Owner preliminary design documents consisting of evaluation of existing structural report, design criteria, drawings, and outline specifications to develop, and establish the scope of each construction contract.
- 8. Prepare a detailed opinion of probable construction costs for each construction contract containing the main construction components, based on the information given in the preliminary design documents.
- **9.** As per Attachment "D", furnish copies of the above preliminary design documents and opinion of probable construction costs for each construction contract. If the above preliminary design documents are not approved by the Owner, the Consultant shall furnish copies of the resubmitted preliminary design documents at no additional cost to the Owner.

PHASE II - PRE-FINAL DESIGN PHASE

The Consultant shall do the following separately:

1. Prepare required documents and assist the Owner in obtaining approval of such governmental authorities as may have jurisdiction over the design criteria applicable to each construction contract. The Consultant's assistance in obtaining such approvals shall

include participation in submissions to and negotiations with the appropriate authorities. The Consultant shall be fully responsible for coordination with all utility companies to resolve conflicts pertaining to location of utility lines and shall exercise customary and usual professional care for obtaining utility clearances. Since some utility locations may not be recorded or mapped, additional efforts to locate utilities maybe required as an additional service upon written approval of the Owner.

- 2. On the basis of the approved preliminary design documents and subject to approval of design criteria, prepare for incorporation in the construction contract documents detailed drawings and plans, hereinafter called the "Drawings," to show the character and scope of the work to be performed by construction contractors on each construction contract, instructions to bidders, general conditions, special conditions, and technical provisions, hereinafter called "Specifications." These plans shall include the required cross sections from actual fieldwork for estimated earthwork quantities.
- 3. Advise the Owner of any adjustment to the Consultant's previous opinion of probable construction costs for each construction contract caused by changes in scope, design requirements, general market conditions, or construction costs and furnish a revised opinion of probable construction costs, based on the completed Drawings and Specifications. The Consultant expressly authorizes any person designated by the Owner to review at any time prior to the Bidding Phase any opinion of probable construction costs made by the Consultant. The Consultant agrees to cooperate fully in such review, and shall furnish the access to all pertinent information upon which the Consultant's cost opinions were based. In addition, detailed estimates to include orderly presented takeoff sheets, summary and main summary sheets are to be provided to the Owner. Nothing in this provision shall be construed as limiting or waiving the right of the Owner to obtain such information at any other time, or as relieving the Consultant of the responsibility of preparing opinions of probable construction costs. The Owner understands that the Consultant has no control over the cost of availability of labor, equipment, market conditions, or the contractor's method of pricing and that the Consultant's opinion of probable construction costs are made on the basis of professional judgment and experience. The Consultant makes no warranty that the bids will not vary from the opinion of probable construction costs.
- 4. Prepare proposal forms.
- 5. As per Attachment "D", furnish to the Owner copies of the Drawings for review by the Owner, other governmental authorities, and the public utilities. If the Drawings are not approved by the Owner, the Consultant shall furnish copies of the resubmitted Drawings at no additional cost to the Owner. Furnish to the Owner copies of the Specifications and copies of the design analysis showing all engineering calculations for review by the Owner, other governmental authorities who may have jurisdiction over each construction contract, and the public utilities.

PHASE III - FINAL DESIGN PHASE

The Consultant shall do the following:

- 1. Incorporate changes requested by the Owner and other governmental authorities after review of pre-final design documents and perform redesign necessitated by public utility conflicts.
- 2. Coordinate closely with utility companies during the Preliminary Design and Pre-Final Design Phases. The amount of redesign necessary to accommodate utility company comments on the pre-final design drawings is expected to be in proportion to the effectiveness of that coordination and is to be performed by the Consultant as part of the Final Design Phase of this Agreement. The Consultant shall obtain written utility clearance from all utility companies affected by the scope of this Project as part of the Final Design Phase of this Agreement.
- **3.** Submit to the Texas Department of Licensing and Regulation, or a State Certified ADA consultant, a set of Final Design Drawings for ADA review and approval.
- **4.** As per Attachment "D", furnish to the Owner copies of final design Drawings and Specifications for review and approval prior to the reproduction for bidding purposes.
- 5. As per Attachment "D", furnish to the Owner copies of the Drawings and Specifications in final approved form for bidding purposes for each construction contract.
- 6. Additional copies of the drawings and specifications beyond those identified in Attachment "D", required for public utilities and other agencies, will be provided by the Consultant as an Additional Service.

BIDDING PHASE

Upon receipt of Owner's written request, the Consultant shall provide any of the following services during the Bidding Phase:

- 1. Assist the Owner in the determination of the bidding period and bid date and provide necessary data for preparation of the notice to bidders by the Owner as required for advertising purposes.
- 2. Assist the Owner in responding to all questions from prospective bidders concerning the Drawings and Specifications.
- **3.** Attend a pre-bid conference, if any, to explain the Project and to answer questions regarding the Project.
- 4. Prepare addenda to the Drawings and Specifications as may be required during the advertising period. Any addenda issued shall be approved by all agencies having approval authority over the Drawings and Specifications. As per Attachment "D", deliver copies of all addenda to the Owner for appropriate action.

- 5. As identified in Attachment "A", assist the Owner in evaluating bids, including obtaining and providing to the Owner reasonably available information as to the quality, ability, and performance record of the three lowest responsible bidders or assist the Owner in rating all bidders using Best Value Evaluation Criteria provided by the Owner, including obtaining and providing to the Owner reasonably available information as to the quality, ability, and performance record of the bidders. If Best Value Evaluation Criteria are required after the consulting fees have been negotiated and accepted, Consultant may request Additional Services fees.
- 6. Advise the Owner concerning the acceptability of subcontractors and other persons and organizations proposed by the general construction contractor for those portions of the work for which such acceptability is required by the construction contract documents.

CONSTRUCTION PHASE

At Owner's request, the Consultant shall provide any of the following services associated with the Construction Phase:

- 1. Attend the pre-construction conference to assist the Owner in responding to all questions from the construction contractor.
- 2. Advise and consult with the Owner and act as the Owner's representative as provided in the general conditions of the Agreement included in the construction contract. Such general conditions shall be the Owner's standard general conditions for construction projects, with such changes and modifications as may be made in such general conditions being agreed to by both the Consultant and the Owner.
- **3.** Unless otherwise stipulated in Attachment "A", Scope of Services, the Consultant will stake one set of control stakes for the construction contractor.
- Visit each construction site at least once each week or more frequently, if necessary, to 4. observe the progress and quality of the executed work and to determine if such work meets the essential performance and design features and the technical and functional requirements of the construction contract documents. The Consultant shall provide the Owner with typed or printed field notes for each construction site visit. On the basis of these on-site observations, the Consultant shall endeavor to guard the Owner against apparent defects and deficiencies in the permanent work constructed by the construction contractor. The Consultant shall not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the work, and shall not be responsible for the construction means, methods, techniques, sequences, or procedures, or the safety precautions incident thereto. The Consultant's efforts shall be directed toward providing assurance for the Owner that each completed construction contract shall conform to the engineering requirements of the construction contract documents. However, the Consultant shall not be responsible for the construction contractor's failure to perform the construction work in accordance with the construction contract documents.

Nothing in this Agreement shall be construed as requiring the Consultant to assume responsibility for or to guarantee the complete adherence of the construction contractor to the Drawings and Specifications and the construction contract documents.

- 5. Review shop drawings diagrams, illustrations, brochures, catalog data, schedules, and samples, the results of tests and inspections and other data which the construction contractor is required to submit, for conformance with the design concept of each construction contract and compliance with the information given in the construction contract documents. Such review must be complete within ten City working days following receipt of submittal documents. The Consultant shall also assemble maintenance and operating instructions, schedules, guarantees, bonds, certificates of inspection, and other documents that the construction contractor is required to submit in accordance with the construction contract documents.
- 6. Issue the Owner's instructions to the construction contractor when required to do so, prepare routine change orders to include independent detailed opinion of probable construction cost for the Owner's approval as required after securing approval of all agencies having approval authority over each construction contract. The Consultant shall require, as the Owner's representative and subject to the written concurrence by the Owner, special inspection or testing of the work, whether or not fabricated, installed, or completed and shall act as interpreter of the terms and conditions of the construction contract. If the Owner authorizes such testing, it shall be addressed under the provisions of Additional Services of the Consultant.
- 7. Based on the Consultant's on-site observations as an experienced and qualified design professional and on review of the construction contractor's applications for payment and supporting data, determine the amount owing to the construction contractor and recommend in writing payment to the construction contractor in such amounts; such recommendation of payment to constitute a representation to the Owner, based on such observations and review, that the work has progressed to the point indicated and that, to the best of the Consultant's knowledge, information and belief, the quality of the work is in accordance with the construction contract documents, subject to an evaluation of the work as a functioning project upon substantial completion, to the results of any subsequent tests called for in the construction contract documents and to any qualifications stated in his approval. By recommending an application for payment, the Consultant shall not be deemed to have represented that the Consultant has made any examination to determine how or for what purposes the construction contractor has used the monies paid on account of each construction contract price.
- 8. Conduct with the Owner and construction contractor no more **than two brief preliminary inspections**, at times requested by the construction contractor to determine if the Project is ready for final inspection.
- 9. Schedule and conduct with the Owner, including representative of the City Engineer and the user department, the State ADA inspector or State certified ADA consultant, and the

construction contractor, a final inspection of the Project and prepare and publish a "punch list" of minor deficiencies to be corrected prior to final payment to the construction contractor. The "**punch list**" shall be furnished to the construction contractor and the Owner within **two City working days** after the final inspection.

- 10. Issue a "<u>Certificate of Substantial Completion</u>" using EJCDC document 1910-8-D (1983 version) when the final inspection reveals that the Project is substantially complete and fully usable for its intended purpose with only minor deficiencies to be corrected. The certificate shall be issued within **two City working days** after the final inspection.
- 11. Monitor and verify proper correction of all punch list deficiencies. Notify the Owner in writing when all deficiencies have been corrected, and when warranty, maintenance, and operating instructions and other documents have been submitted by the construction contractor. Act on and forward the construction contractor's final invoice for payment.

- 14. Notify the Owner of all permanent work which does not conform to the result required in each construction contract; prepare a written report describing any apparent nonconforming permanent work, and make recommendations to the Owner for its correction and, at the Owner's request, have recommendations implemented by the construction contractor.
- **15.** Furnish property surveys and legal descriptions as needed to acquire additional right-ofway or additional property.
- **16.** Revise previously approved studies, reports, design documents, drawings, or specifications, except when said revisions are required as a result of errors, negligence, or other fault on the part of the Consultant.

- 24. Provide extensive assistance in the initial start-up and test operation of equipment or devices and the preparation of manuals of operation and maintenance.
- 25. Serve as an expert witness for the Owner in any litigation or other proceeding involving the Project.
