NOTICE OF SPECIAL MEETING OF THE CITY COUNCIL OF THE CITY OF EL PASO

December 01, 2021 El Paso Museum of Art - 1 Arts Festival Plaza - El Paso, TX 79901 9:00 AM THE LOCAL HEALTH AUTHORITY STRONGLY RECOMMENDS THE USE OF MASKS IN ALL CITY FACILITIES AND INDOOR SPACES

Notice is hereby given that a Special City Council Meeting of the City Council of the City of El Paso will be conducted on December 1, 2021 at 9:00 A.M.

The public is strongly encouraged to sign up to speak on the item on this agenda before the start of this meeting on the following link:

http://legacy.elpasotexas.gov/muni_clerk/Sign-Up-Form-Special-Council.php

AGENDA

 1.
 Presentations, discussion and action on an update to the Strategic Plan,
 21-1362

 including but not limited to, key focus areas and future strategic objectives
 toward 2030.

All Districts

City Clerk's Office, Julie Baldwin Muñoz, (915) 212-1204

EXECUTIVE SESSION

The City Council of the City of El Paso may retire into EXECUTIVE SESSION pursuant to Section 3.5A of the El Paso City Charter and the Texas Government Code, Chapter 551, Subchapter D, to discuss any of the following: (The items listed below are matters of the sort routinely discussed in Executive Session, but the City Council of the City of El Paso may move to Executive Session any of the items on this agenda, consistent with the terms of the Open Meetings Act and the Rules of City Council.) The City Council will return to open session to take any final action and may also, at any time during the meeting, bring forward any of the following items for public discussion, as appropriate.

Section 551.071	CONSULTATION WITH ATTORNEY
Section 551.072	DELIBERATION REGARDING REAL PROPERTY
Section 551.073	DELIBERATION REGARDING PROSPECTIVE GIFTS
Section 551.074	PERSONNEL MATTERS
Section 551.076	DELIBERATION REGARDING SECURITY DEVICES OR SECURITY AUDITS
Section 551.087	DELIBERATION REGARDING ECONOMIC DEVELOPMENT NEGOTIATIONS
Section 551.089	DELIBERATION REGARDING SECURITY DEVICES OR SECURITY AUDITS; CLOSED
	MEETING

ADJOURN

NOTICE TO THE PUBLIC:

If you need Spanish Translation Services, you must email CityClerk@elpasotexas.gov at least 48 hours in advance of the meeting.

DAY ONE: What we will cover

PART ONE				
Our Big Picture: what does supporting a high quality of life + place look and feel like?				
@ Energy Auditorium (2 nd floor)				
9:00 am	Welcome + Opening Remarks Mayor & City Council			
9:15 am	Overview and Strategic Context City Manager, Tommy Gonzalez			
9:30 am	Council Presentations (up to 21 mins for each presenter)			
~12:15 pm-1:15 pm RecessLunch provided on-site @ C2 Gallery (1st Floor)				
PART TWO Voice of our Community (Trend Analysis, Data and Key Insights) @ C2 Gallery (1 st Floor)				
1:15 pm	 Trend Analysis (El Paso Chamber, <i>David Jerome</i>) Community Partner Feedback: Key Takeaways (<i>Nicole Ferrini</i>) 			
2:45 pm break				
3:00 pm	 Resident Feedback: Key Takeaways (Juliana Baldwin-Munoz, Nicole Cote) Demographic snapshot and priority mapping (Alex Hoffman) 			
AdjournmentDay One				

DAY TWO: What we will cover

DAY TWO: Thursday, December 2, 2021 @ the Museum of Art				
PART THREE: Painting the Picture New focus areas and future initiatives @ C2 Gallery (1 st Floor)				
9:00 am	Recap key takeaways from Day One			
10:00 am	Facilitated discussion on key strategic opportunities by Vision Block:			
	Vibrant Regional Economy (up to an 1hr.)			
	10 minbreak			
	Safe & Beautiful Neighborhoods (up to an 1hr.)			
12:10pm-1:00pm RecessLunch provided on-site @ C2 Gallery (1st Floor)				
1:00 pm	Facilitated discussion on key strategic opportunities by Vision Block:			
	Exceptional Recreational, Cultural and Educational Opportunities (up to an 1hr.)			
	10 minbreak			
	High Performing Government (up to an 1hr.)			
	20 minbreak			
PART FOUR: Alignment				
3:20 pm	Discussion and action on an update to the Strategic Plan including key focus areas and			
	future initiatives toward 2030.			
AdjournmentDay Two				

OVERVIEW + STRATEGIC CONTEXT Tommy Gonzalez, City Manager

Addressing decades of operational neglect

Creating new revenue sources

Utilizing best practice programs for cost savings and efficiencies

Increasing fund balance/stabilization fund (goal of 90 operating days)

LONG-TERM FINANCIAL SUSTAINABILITY

THEN...

CHALLENGES

- Declining fund balance budget accuracy & discipline
- Declining police department staffing due to irregular/canceled academies
- No regular schedule for street maintenance projects
- Operating costs for Quality of Life projects not factored in
- No regular replacement cycle for public safety vehicles/equipment

- No regular investment in preventative maintenance for facilities
- No regular maintenance for sport courts and complexes
- No regular funding for ADA on-demand request projects
- Majority of funding for Economic incentives was committed to one project
- No compensation adjustments and increasing healthcare

MINIMIZING DEBT & ADDRESSING DECADES OF NEGLECT

(SINCE FY2016-FY 2022) High Performing Government **\$70M** in public safety investments with \$18.9M in capital replacement

\$41.5M in street maintenance and traffic safety

\$49.7M in quality of life operating and maintenance for sports complexes and sports court resurfacing

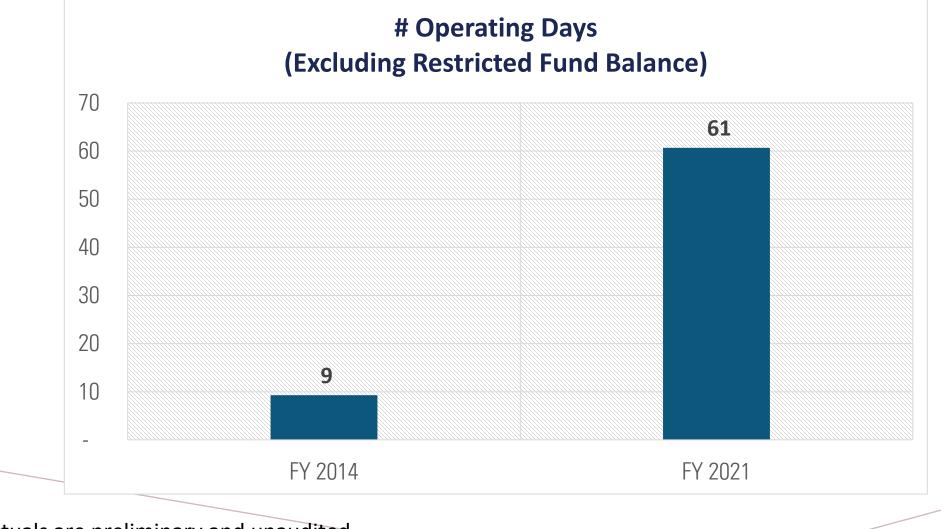

Increase In Fund Balance- increased reserves by \$75.5M, which included \$41.6M in the budget stabilization fund.

Dedicated funding to address economic development strategies - \$10M in additional annual funding dedicated for economic incentive projects.

Workforce Focus - **Six Consecutive Years** of compensation adjustments. No health care increases last year. Shape it Up wellness program.

INCREASING GENERAL FUND RESERVES

(FUND BALANCE)

How to use Trends to position El Paso as a global city

October 2021

City of El Paso x EPC

Outline

01. Why & What

02. Trends

03. Brainstorm / Next Steps

The EPC

To Transform Business & Improve Lives in the El Paso Metropolitan Region

Connecting
Coaching
Advocating
Innovating

The Collisions Approach is a systematic way for us to capture trends in strategy – done in collaboration with Dr. Tim Jones, Future Agenda, London UK

We review multiple global trends, facts, and perspectives to identify the "market-shaping forces"

These forces are then used to pinpoint new investment opportunities, mitigate risks, stresstest an existing strategy, and craft a new strategic direction here in El Paso

Our Approach

El Paso 2030

There are 500 City's on our planet with over 1 million

Of these, 140 drive Finance, Fashion & Culture

These City's disproportionately benefit their citizens

In the next decade, 100 will move into this important cohort

How do we make sure El Paso is next?

Build a Better Roadmap

Hope is not a strategy

A strategy is an objective + roadmap

Strategy should have multiple time horizons

Companies that analyze trends are 6X more

likely to outperform

MARCH 2021

RESILIENCE

COVID-19 Resets Normal

© Thomas Hawk

Gross domestic product, population growth, wages, and educational attainment are generally favorable for the El Paso metropolitan region, especially during the current crisis. While the full impact of COVID-19 is still difficult to predict, recovery is expected to be muted through 2021/2022, after which momentum should begin to build.

When previously compared to the best performing cities in the United States, key indicators in El Paso have often been seen as lagging (lower wage and property value growth as well as high government-related employment). During the current crisis, however, these key indicators have become ways to soften the effects of the crisis and reimagine El Paso's future.

Enhanced performance across El Paso in the wake of COVID-19 will be driven by increased and improved collaboration between businesses, government, and non- profits. These collaborations should focus, at least in part, on sector-driven policy change and major reskilling efforts.

QUESTIONS

Which long-term issues will most encourage organizations to collaborate? What will be the key factors that drive future resilience and growth?

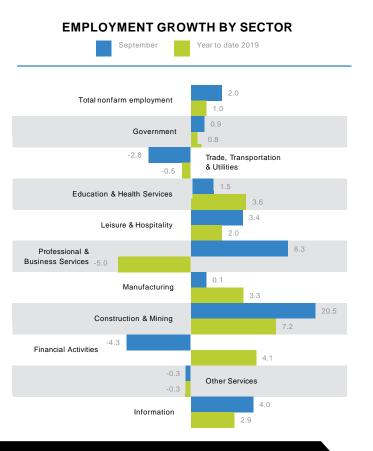

Key Trends

Resilience by Design: As global supply chains evolve to become flexible, shared, regional supply webs, manufacturing will shift from centralized production to a smaller, distributed approach in which competitors access shared—not proprietary—networks and systems.

Economic Resilience: Resilience can be strengthened by implementing strategies that simultaneously anticipate and mitigate the risks and consequences of severe crises. The Organization for Economic Co- operation and Development advises increasing the monitoring of home- grown vulnerabilities. At the same time, communities must also identify policies and mechanisms that can be instituted ex ante to absorb the impact of a severe downturn.

Reinventing Roles: The job market faces new challenges from COVID19. These challenges must be met with more collaboration between organizations and policymakers to rethink and retool existing roles.

Deeper Collaboration: As cities, organizations, and universities join forces to adapt to market demands and worldwide economic trends, new partnerships have emerged to support small business and drive innovative practices. These types of programs promote locally-owned and growing enterprises.

Exemplar Cities

Stockholm, Sweden: Flexible workforce with robust education and technology skills Pittsburg, PA: Strong, innovative ecosystem incorporating revitalized industries

Pursuing Strategic High-Wage Job Growth

GROWTH

© Thomas Hawk

The need for bilingual and culturally-skilled workers has consistently increased at a national level. Given El Paso's bilingual and bicultural identity, the

region has a major opportunity to grow and attract organizations serving an increasingly diverse public.

El Paso should focus on its core sectors and ensure that new policies are beneficial to business in trade, infrastructure, healthcare, supply chains, and higher education.

Gross domestic product growth in El Paso will be greatly assisted by having a strategic approach to high- wage job growth. This will be driven by near- to mid- term stimulus from economic development, forecast regulatory changes in healthcare, and redoubled pressures to nearshore supply chains.

Questions

What are the future needs in your sector that the El Paso region can meet? How can El Paso brand itself as a city with an international and bilingual workforce?

Key Trends

Doubling Income: Achieving 100% wage growth for El Paso's workers by 2030 means catching up to the average American today. El Paso can offer the business community significant growth in productivity if wages increase. The lower cost of living associated with the region would amplify this effect.

Countering Inequality: Increasing available high-wage job opportunities will help shrink the wealth gap, prepare for new industries, and support a stable long-term outlook. Cultivating a virtuous circle—where higher wages increase productivity and positively impact quality of life—drives wage increases through competition.

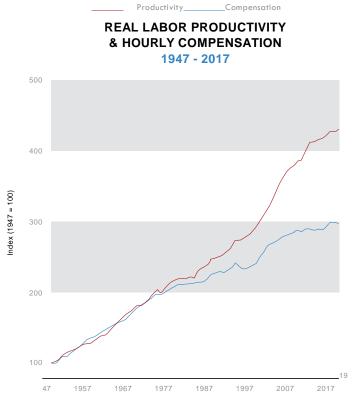

Reskilling the Workforce: El Paso has several sources of high-quality training available. Focusing on in-demand skills will make the workforce more attractive to new and existing firms.

Value of Data: The urge to pursue all high-wage industries is tempting but data can identify the opportunities El Paso is best able to capitalize on. As organizations try to retain as much information as possible, data becomes a currency with a value and price.

Exemplar Cities

Reading, United Kingdom: UK's #1 city for sustained economic growth Atlanta, GA: One of the best cities for jobs, especially among millennials

TRADE

Becoming a 21st Century Port City

© Jasperdo

Beginning with the Camino Real, El Paso has historically served as an essential intersection on American trade routes. Today, El Paso is still a focal point for trade and travel between both the United States' East and West coasts and between Mexico and Canada. Mexico, Canada, and China are El Paso's largest trading partners, and I-10 is the only all-weather East-West interstate highway for freight and travel in the USA.

El Paso must focus on enhancing its ports and encouraging the construction of additional trade- related infrastructure. This will become increasingly important as infrastructure is supported as economic stimulus through the mid-term and as pressure mounts to rethink policy on trade and supply chain resilience. Longer term, El Paso could manage ports for others.

QUESTIONS

What are the major trade shifts that will impact El Paso in the next decade? How can El Paso anticipate and adapt to these shifts to be globally competitive?

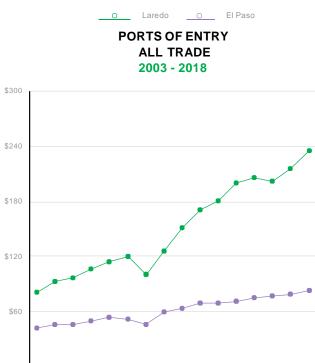

Key Trends

International Leader: With 82 ports in 40 countries, DP World has become a leading operator of ports globally. The company specializes in cargo logistics, port terminal operations, maritime services, and free trade zones. They are known as a global leader of excellence in trade and associated services.

Digital Trade: The adoption of digital strategies by global importers and exporters represents a profound shift in the future of trade. As many as 350 million more businesses could begin to export through digital commerce in the next decade.

Data for Good: The accurate and appropriate use of data can help individuals make better informed decisions about their transportation methods, routes, suppliers, and business practices in turn improving local economies and quality of life.

Cities Not States: Borders will always be governed to a large extent by the federal government. But today, many cities manage the infrastructure behind ports of entry. Investing in state-of-the-art tolling and management technologies on El Paso's bridges is a valuable long-term investment.

COLLABORATION

Regional Collaboration to Optimize the Use of Limited Resources

Fort Bliss, Ciudad Juarez's manufacturing industry, and the University of Texas at El Paso are natural partnerships that have helped to grow business locally in the past. They will be critical in continuing to drive the growth of design centers and other industries with high-wage potential

Prior to the COVID-19 crisis, the El Paso region was already limited in its resources. As the community begins to recover and reimagine the new normal, organizations should seek out meaningful partnerships that maximize the efficacy of limited resources. Brand and policy development will be pivotal in ensuring success.

The El Paso region should focus its partnerships on opportunities with the greatest chance of success. Efforts should focus on existing business strengths rather than on growing industries the city does not have the resources to launch.

Questions

What does smart, regional collaboration look like for El Paso? What are the resources in El Paso that best lend themselves to collaboration?

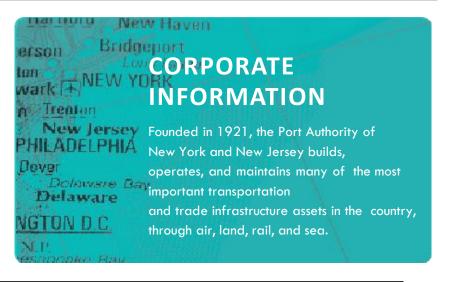

Key Trends

Declining Government Influence: Changes in political climates, economics, and world culture have pushed local communities to act beyond local, state, and federal politics. Decisions at the local level can often have a greater impact on the environment, culture, and economy. More and more leading cities are collaborating with citizens and businesses around common goals and global challenges for good.

Deeper Collaboration: Partnerships are evolving to become more dynamic, long-term, democratized, and multi-party collaborations. Competitor alliances and wider public participation are driving regulators to create new legal frameworks for open, empathetic collaboration. Unified action by cities and businesses around issues like clean energy and emissions reduction have amplified their capacity for positive impact. These efforts in turn have directed policymakers to focus on the most urgent matters affecting states, particularly where there is an absence of federal intervention.

Proactive Catalysts: More and more city governments are acting as catalysts for new partnerships. In the Far West Texas region, the El Paso Collaborative for Academic Excellence has generated sizable contributions to enrollment, graduation, and skilling rates.

Public Private Partnerships: P3 collaboration is growing globally as a means of aligning and funding targeted action in key areas like education, healthcare, and infrastructure. In many leading cities, it is the preferred option for development.

EXEMPLAR CITIES

Barcelona, Spain: Reinvented itself over the past 30 years San Diego, CA: Multiple projects coordinated by San Diego Association of Governments

UPSKILLING Lifelong Learning Maximizes Competitiveness

© Bill Henderson

Employers have traditionally been the sole providers of training and continuing learning opportunities for many workers. However, new public/private partnerships are increasingly focused on empowering the individual.

The challenges created by the COVID-19 crisis have demonstrated the range of opportunities for online, self-paced learning. The ability of individuals to have greater control over expanding their skill sets is now more realistic and prevalent.

In order to remain competitive, the traditional model of front-loading education early in life must give way to a lifelong learning approach where individuals access and top up skills throughout their working years

QUESTIONS

What would a 20-year, part-time, flexible degree look like? How can education providers train a company's workforce for new skills?

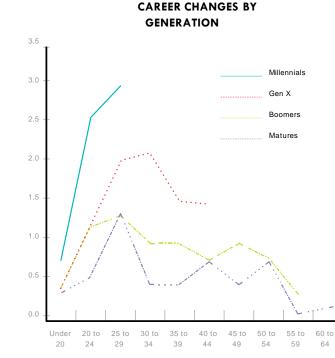

Key Trends

Companies with Purpose: Companies are under increasing scrutiny for how they treat their workforce. Automation is disrupting several industries—none more so than manufacturing and logistics. Typically, job displacement has corresponded with layoffs; however, more progressive companies are looking to retrain their workforce to fill needs within the company. The COVID-19 pandemic will most likely accelerate the shift towards automation, but it will also provide increased opportunities for remote learning.

Valued Part-Time Work: As more companies shift to four-day work weeks and wider job sharing, the importance of part-time work has increased.

Working Longer: Funding a 30-year retirement with a 40-year career and retiring at age 65 is no longer feasible for many. Most individuals expect to have three career changes in their working life. At the same time, more and more countries are considering a pension age of 70.

Reskilling and Upskilling: Acquiring new skills opens new possibilities for work as well as improving quality of life with a long-term impact. Governments and universities are expanding the types of educational opportunities available for workers.

Helsinki, Finland: Good education system and close-knit community Oklahoma City, OK: Numerous opportunities for learning at various stages

QUALITY of LIFE

A Vibrant Culture and City Attracts Top Talent and Companies

© Visit El Paso

During the 2000s, suburban growth dwarfed city growth. The 2010s began with a "return to the city" movement partially motivated by a down suburban housing market and the decision of young adult millennials to locate in cities. Between 2010 and 2018, big city and suburban growth rates were at similar levels representing a major shift from the previous decade.

Downtowns attract more high-density commercial development, which is critical for maintaining a healthy tax base.

El Paso's investments in quality of life have already delivered major benefits. This will continue to pay off as planned projects are completed as new ones are developed.

A high quality of life is critical for providing amenities that attract young professionals. Accessible recreation, attractive and safe neighborhoods, excellent schools, and vibrant arts and culture scene all assist in attracting top talent.

QUESTIONS

What new cultural events and platforms could be unique to El Paso? What can El Paso provide to attract mobile talent?

Key Trends

EXEMPLAR

CITIES

Placemaking: Strengthening citizens' connections to shared spaces is a collaborative process that ultimately maximizes the value of public spaces. Cities must cultivate compelling settings and events to engage with the community in order to retain families and professionals. For regions with substantial historic and cultural roots, emphasizing and complimenting existing assets can enable communities to feel a stronger sense of belonging and can also attract those outside the region.

Downtown Destination: Favoring downtown revitalization over further urban sprawl creates greater value and financial advantage for the area while also capitalizing on existing infrastructure. High-profile developments can transform perceptions of pivotal urban spaces and encourage residents to view downtown as desirable. Downtown areas should be revitalized to create an interesting and safe streetscape that can comfortably meet the needs of citizens.

Walkable City: Walkable cities are safer, more attractive, more inclusive, easier to govern, and can better share resources. Walkability also supports downtown revitalization efforts by drawing together business and local interest.

Cultural Hubs: Community-driven cultural events create greater social cohesion and inbound tourism. Cultural capital is a key contributor for urban economic growth and a strong sense of local culture helps to shape economic development.

MIGRATION

MAGNET

Population Growth Means Economic Growth

© Second Half Travels

For much of the recent past, the United States has been one of the most rapidly growing countries in the industrialized world due to the post-World War II baby

boom and rising immigration during the 1980s and 1990s. However, the 2020 census will likely show the smallest decade-long growth rate in America's history.

The slowing labor force growth is the product of several factors: the aging of the U.S. population; retiring baby boomers; declining birth rates; and a sharp drop

in immigration.

In the past two decades, immigrants and their children constituted more than half of workforce growth. However, according to Census Bureau estimates, net international migration to the United States dropped from 1 million people in 2016 to just less than 600,000 in 2019, representing a 43% decline. The economy expands with growth in the labor force and its productivity; absent offsetting increases in productivity growth, reductions in immigration will translate directly into slower gross domestic product growth.

QUESTIONS

How can a more focused approach to migration and immigration fuel sustained growth? What proactive policies will position El Paso as a migration magnet?

Key Trends

Positive Economic Impact: Most studies find that migration has a net positive economic impact on communities where migrants settle. Estimates suggest that if immigration to the United States continued at its 2016 levels, the labor force would grow at a 0.45% annual rate from 2016 to 2060, eventually creating a 193-million-person workforce.

Competitive Migration: Canada and New Zealand are the most progressive immigration-focused nations globally. Both have clear messaging and aligned policies that target specific skillsets and use migration to enhance competitiveness.

Accelerating Displacement: Climate change is driving the largest net movement of people in history; the number of displaced individuals is expected to reach 1 billion by the end of the century. Although a major global challenge, this also represents an opportunity for proactive positioning by leading migration magnets.

Countering Inequality: Many workers and students who cross the border every day into El Paso suffer from long wait times on the bridges. Reducing bridge wait times could result in improvements to health, productivity, and the environment.

Domestic Migration: Although international migration is in the political spotlight for many nations, supporting the growth of domestic movement of talent is seen positively by many. Cities are continuing to compete to attract the best talent.

U.S. POPULATION GROWTH FOR DECADES:

*Projected. Source: Metropolitan Policy Program at Brookings; William H Frey analysis of U.S. decennial censuses 1790-2010 and author's projection to April 1, 2020.

FOCUS Know Our Strengths & Nurture The Emerging Sectors

© Kent Kanouse

El Paso's current strengths are in the following sectors: transportation, ports, higher education, healthcare, property development, military, trade & commerce and energy.

El Paso has emerging advantages in aerospace engineering, sports entertainment, defense, energy- related research, the arts, economic tourism, hospitality, and additive and high-tech manufacturing.

There is a temptation to expend energy and resources pursuing all potential high-wage sectors for inbound investment. However, focusing resources on a few sectors with the greatest potential for growth will lead to the greatest results. In addition, upskilling and reskilling efforts are instrumental in enhancing existing strengths and preparing for new sectors.

QUESTIONS

Which of El Paso's sectors are positioned for the greatest long-term growth? What type of support will make El Paso companies a magnet for these sectors?

Key Trends

Creative Hubs: A dynamic ecosystem of creative spaces and communities has emerged globally over the last ten years. These systems guide the new urban economy and have become a new way of organizing creative economy innovation and development.

Bilingual Services: New focus has been placed on services over manufacturing in many economies. As a result, traditional laborers must be prepared and retrained. With its binational identity, El Paso is naturally positioned to meet the nation's growing need for bilingual and culturally skilled workers.

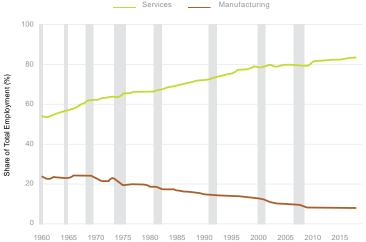

Open Data: Many cities are driving growth by encouraging the sharing of data sets. Open data drives employment and proliferation of technology. Safe data usage also accelerates the growth of emerging sectors. These help reduce unemployment, attract skilled labor, and lower the cost of business.

Military Towns: Many cities with strong connections to the military are prioritized by employers. Military bases—especially those that employ engineers, scientists, professionals, and high-level managers—can benefit communities by attracting business. Fort Bragg, Fort Lee, and Fort Aberdeen are all seen as gateways to growth, as is Fort Bliss.

EXISTING FRIENDS

Business Retention and Expansion is a Bigger Bang for Your Buck

© Thomas Hawk

Cities often focus on attracting outside companies at the expense of encouraging existing business.

Existing businesses, however, have an outsized positive impact on job growth: up to 80% of net job growth comes from existing businesses. Additionally, existing businesses are a primary source of information about the community for companies looking to relocate.

If nurtured to grow, local companies (especially small to medium enterprises) will initiate a major financial impact that largely stays local and provides a good return on incentive investments. This strategy will be reinforced as infrastructure and other stimuli are rolled out.

QUESTIONS

What financial intervention would have most impact on boosting local firms? What interventions can deliver a maximum sustained benefit?

Key Trends

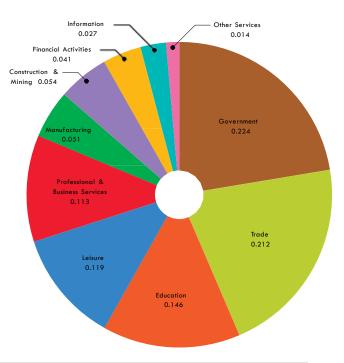

Levelling Up: Offering opportunities and incentives gives businesses the support they need to expand and increase their value. By providing a more level playing field, community members will be encouraged to start their own businesses in turn creating a cycle of economic dynamism.

Aligned Narratives: Cities that have sustained growth benefit from clear ambition and vision that cuts across all key facets of life.

City Focus: By focusing incentive efforts at a local level, cities brand themselves as business-friendly and thoughtful cities that are welcoming to entrepreneurs and new ideas. With local support, small businesses can expand and take on a more significant role in local economies; larger enterprises will naturally follow, bringing with them opportunities, development, and new ways for the community to connect and grow regionally.

Planned Growth: Although many focus on the rapid, expansion of Asian and African cities, planned growth is critical to most successes globally. Focusing on a long-term, regularly revisited, integrated masterplan that connects transportation, economic development, healthcare, education, and housing will ensure dynamic and productive growth.

SUSTAINABILITY

The Environment is in

our Nature

© MLH

As a resource-constrained community located in a high desert, it is natural for El Paso to focus on sustainability. In addition, the potential for job and productivity gains are considerable, especially as industries seek to develop future-focused solutions.

El Paso should establish itself as a thought-leader on the management of key utilities like gas, water, and electric. However, given El Paso's current position, the city should also seek to maximize its strengths around oil refining.

Every local company should develop a corporate social responsibility ethos or shared value as a core of their business strategy. Not only will consumers increasingly demand it, but it is also philosophically the right thing to do for our future.

QUESTIONS

How can the El Paso business community lead sustainability efforts nationally? What partnerships can help shift State (and Federal) polices?

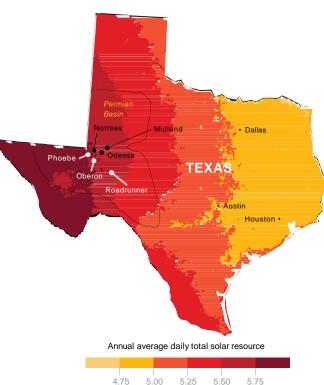

Key Trends

Green Cities: Sustainable urban development results in economic, social, and environmental benefits. Economically, the benefits include agglomeration economies, lower infrastructure costs, and reduced congestion costs while reducing carbon emissions and other environmental pressure.

Solar Cities: The International Energy Agency expects that there will be a 5x growth in solar energy over the next decade. El Paso has natural solar energy resources that have not been fully realized. Incentivizing the community to export in abundance can open income opportunities to those who might otherwise struggle.

Local Living: Concerns for sustainability become a rallying cry for global citizens across the region and the world. For example, the people of Boulder, CO live, work, and play in their own backyard by supporting local business, practicing sustainability, and being virtuous wardens of Boulder's natural resources.

Sustainable Companies: Consumers prefer sustainable companies and are becoming more informed and educated. Customers have repeatedly demonstrated a preference for socially responsible and altruistic brands, going as far as engaging in boycotting campaigns to deter old practice and encourage sustainable measures.

BOARD/COMMITTEE STRATEGIC ALIGNMENT

Regional Renewable Energy Advisory Council

MIGUEL FRAGA, CHAIR / JOSHUA SIMMONS, VICE-CHAIR

Recommendations of the RREAC will be **aligned with strategic goals** in pursuit of the identified and adopted mission / vision

KEY RREAC PRIORITIES BASED ON STRATEGIC GOALS

- Create a Bilingual Education Campaign
- Identify and study the viability of solar /renewable energy code requirements.
- Reduce overall energy consumption and enhance energy efficiency in municipally owned facilities
- Recommend incentive programs targeted for businesses in the area of renewable technology

Strategic Plan for Veteran Affairs Advisory Committee

Veterans Affairs Advisory Committee

- District 1: Tephanie Hopper*
- District 2: Hope Jackson*
 District 3: Don Parrott
- District 3: Don Parlott
 District 4: Jonathan Bohannon
- District 5: Laura Butler (Secretary
- District 6: Bruce Biegel* (Vice-Chair)
- District 7: Justin Rotti
- District 8: Melissa Harcrow
- Mayor: Lance Lehr (Chair

* Subcommittee Chair

Goals

September 13th, 2021

Goal 4.1: (City 6.1/6.2) Address Veteran employment in the city strategic plan by placing a goal (6.1.1) to *Obtain a 15% Veteran Workforce by 2025*

Goal 4.2: (City 5.5) Address Veteran communication in the City strategic plan by placing a goal (5.5.1) to *Expand Veteran presence on our web pages and social media sites and build a comprehensive strategy to connect with Veterans and Service Members*

Goal 4.3: (City 8.1) Address Veteran homelessness in the city strategic plan by placing a goal (8.1.1) to *Sustain the funding of case management, supportive services and rental assistance to homeless Veterans*

BOARD/COMMITTEE STRATEGIC ALIGNMENT

Resident Feedback: key takeaways

DEMOGRAPHIC SNAPSHOT Needs Assessment + Priority Mapping

ALEX HOFFMAN, ASSISTANT DIRECTOR, CID

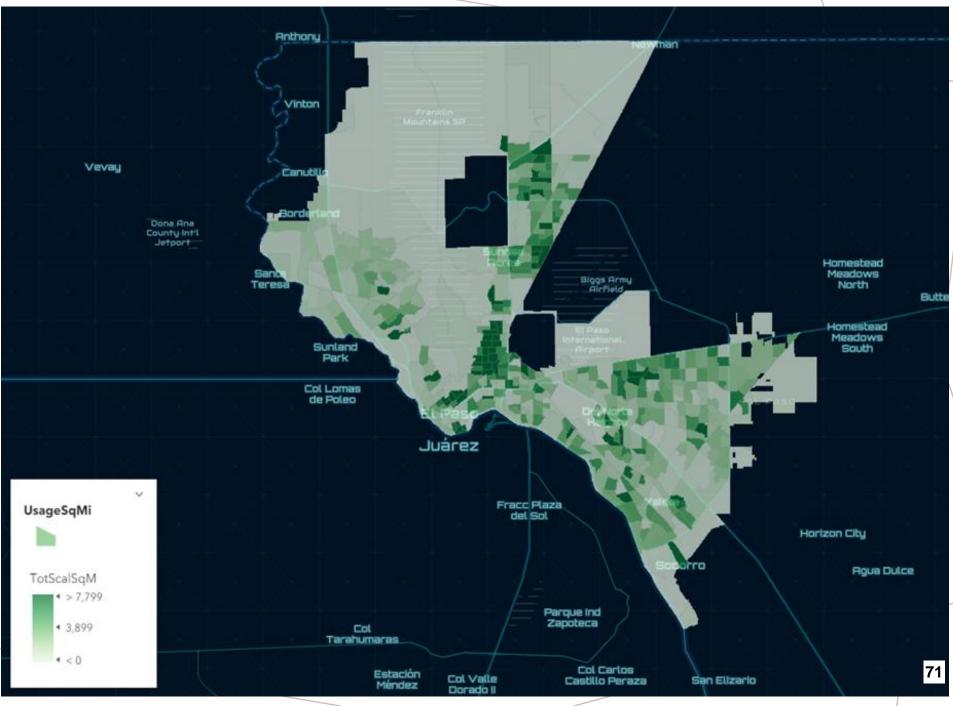

In order to plan for future needs, we must know both the location and the types of facilities being demanded.

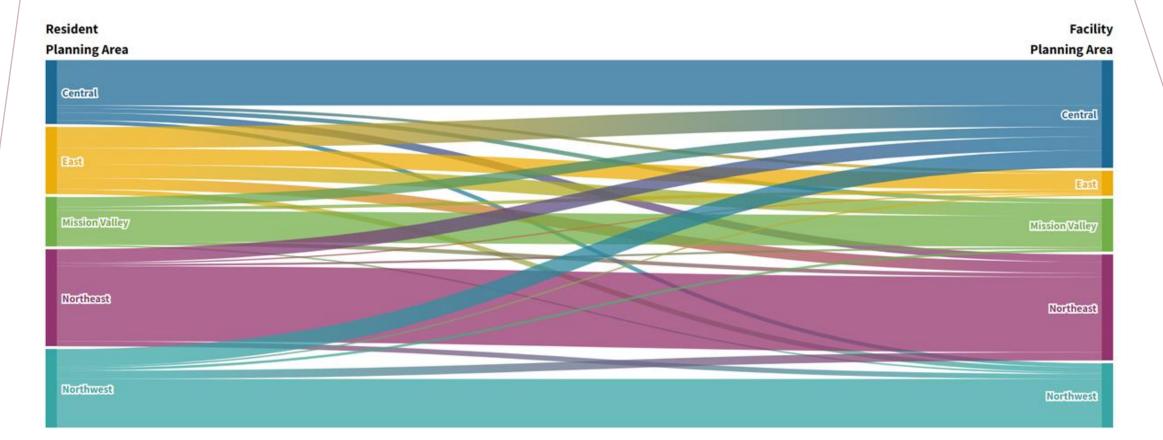

This can be determined by:

- Identifying visitor home location;
- Resident to facility origin/destinations;
- Facility usage by type; and
- The effects of combining services into single facilities

City Facility Users, Home Location

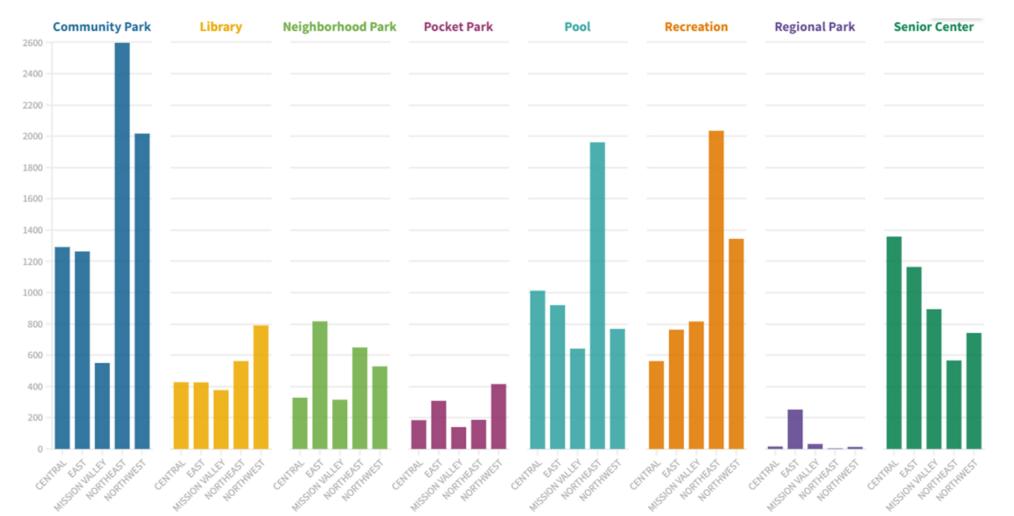

Resident and Facility Planning Area Flows

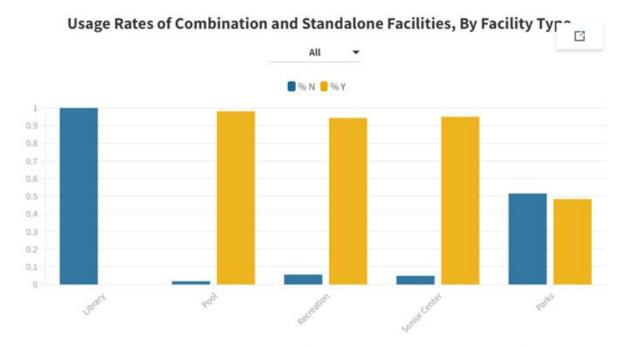

City Facility Users, By Facility Type and User's Home Planning Area

Combining Services

Additionally, the data suggests that overall city facilities that have more than one service co-located on its campus with another get significant greater usage than standalone facilities. Parks and libraries are notable exceptions, but for all other service types the difference is significant. *Based on monthly average attendance, combination facilities are used nearly twice as much (1.87 times, to be exact) than standalone facilities.*

Facility Campuses Where More Than One Service Is Provided Get More Usage Across the Board When Compared to Single Service Facilities **Transparent Project Selection Process**

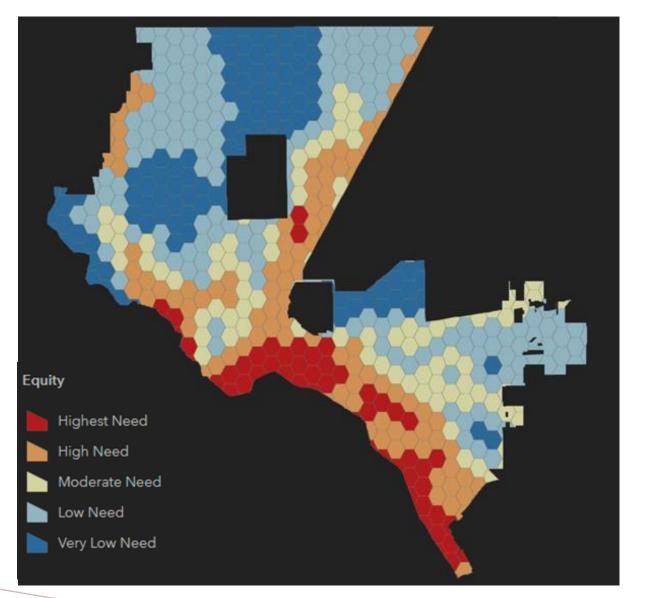

With limited resources, we must be intentional in the selection of projects for funding.

We propose selection be based on the following criteria:

- Equity—prioritizing areas of highest need;
- Access—adding facilities in locations where there are gaps in service;
- **Strategic**—prioritizing projects identified in the Strategic Plan as a priority area

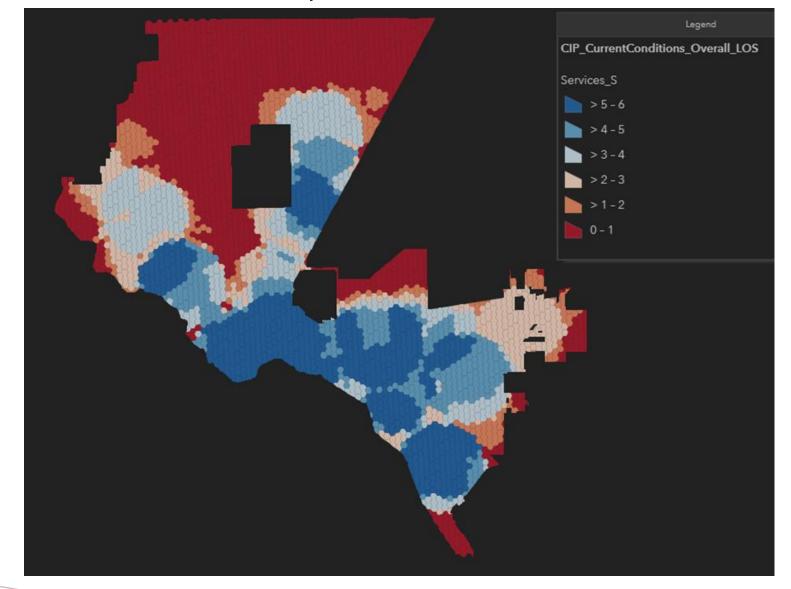

Equity Considerations

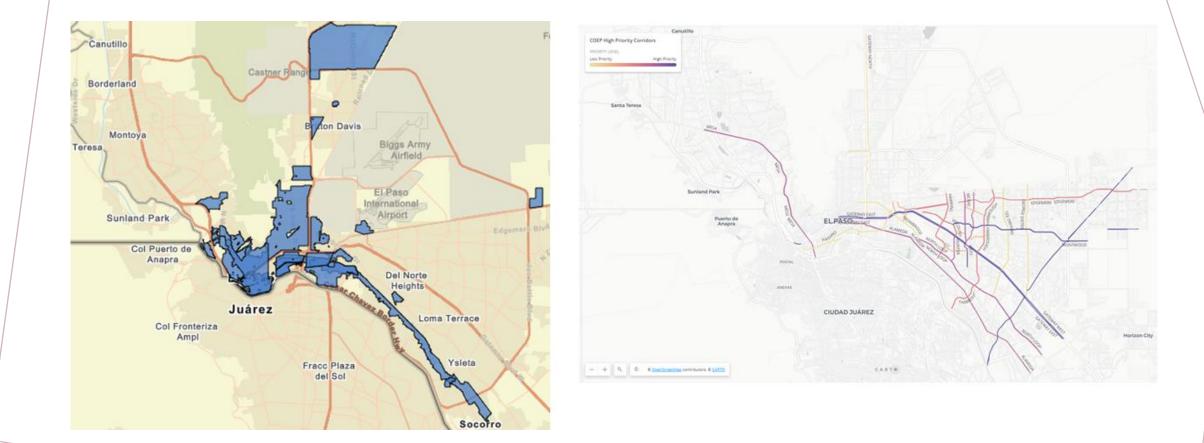

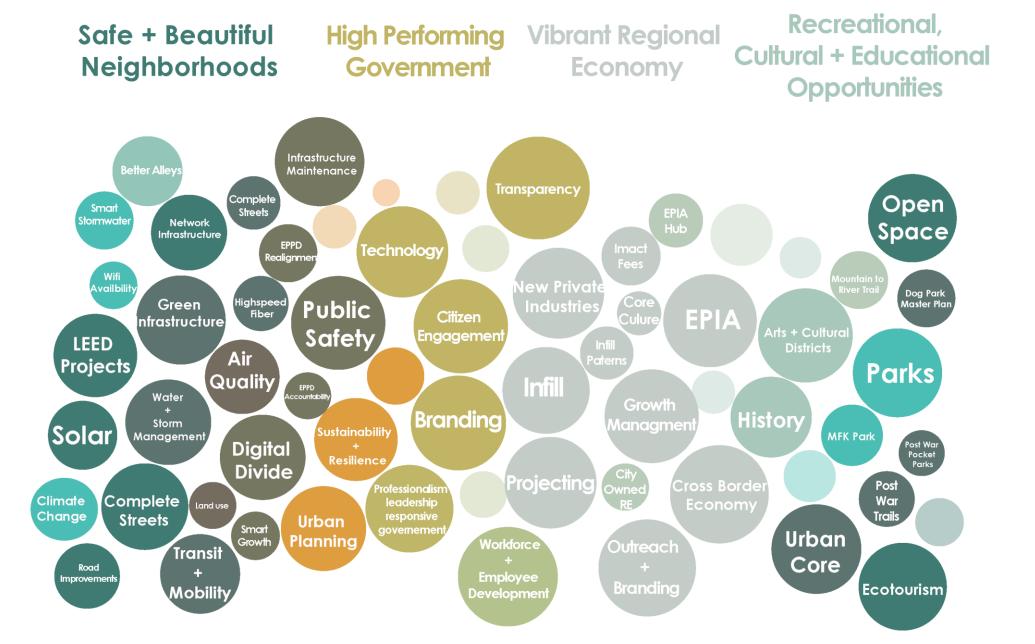

Gaps in Service

Priority Areas and Corridors, via the Strategic Plan

75

Note: The items in this diagram are derived from projects, programs and strategy focus areas as identified by city council representatives, city leadership and contributing departments. Some submitted items have been condensed for the sake of the visual or grouped together with other similar items. The size of the bubbles does not indicate priority, it indicates the position in a hierarchy of strategies and projects; i.e. a larger bubble may encompass more subordinate strategies or programs than a smaller bubble which may represent a more specific project or potential deliverable. The color gradient is intended to show the interconnectivity and overlap of a focus area within the hierarchy of the strategic vision block system. For example, "InfiII" sits closer to the boundary between high performing government and a vibrant regional economy. InfiII strategies primarily impact population and economic growth but will also have revenue and ordinance impacts associated with high performing government block.

KEY STRATEGIC OPPORTUNITIES Alignment

Key Strategic Opportunities

- 25 by 25 Key Strategic Objectives still well supported and aligned
 - Reinforced through various feedback methods
- New key focus areas spotlight emerging priorities + key insights from voice of our community data
- 5 new key strategic objectives proposed (cross cutting) toward 2030
 - 25 by 25 + 5 new strategic objectives = 30 by 30

Top 3 Areas:

- 1. Support Livelihood + Employment
- 2. Fosters Long Term + Integrated Planning
- 3. Fosters Economic Prosperity

Key Takeaways:

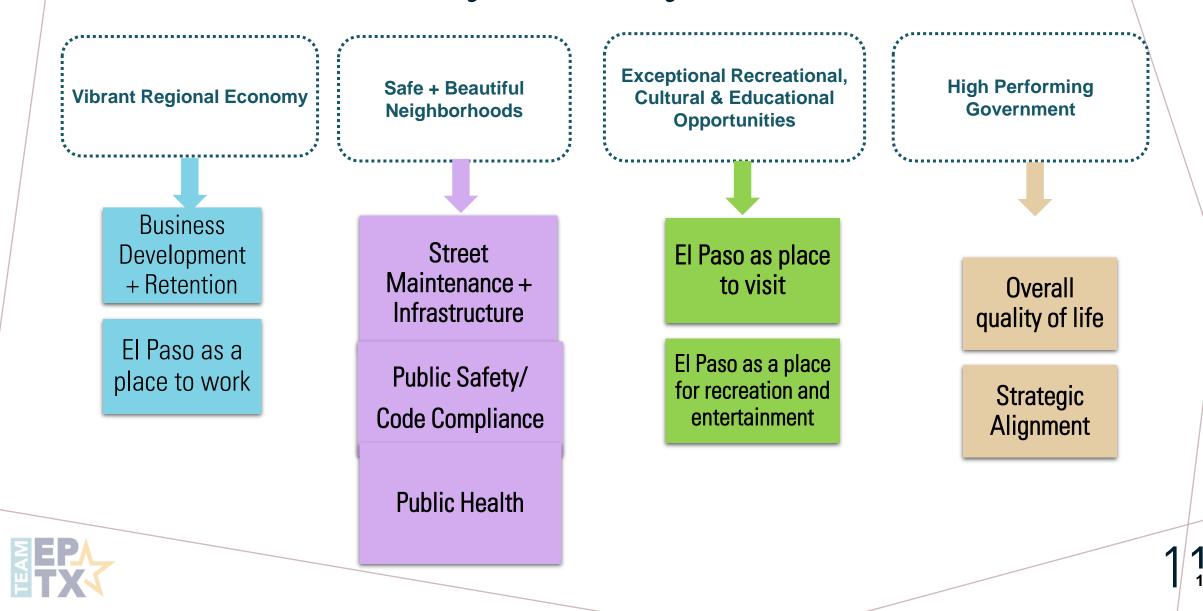

- 1. Focus has shifted from response and relief toward **recovery**
- 2. Need for broad and dynamic alignment of priorities and resources across the community
- 3. Basic Needs, Livelihood and Economic Prosperity are **inextricably** linked priorities.

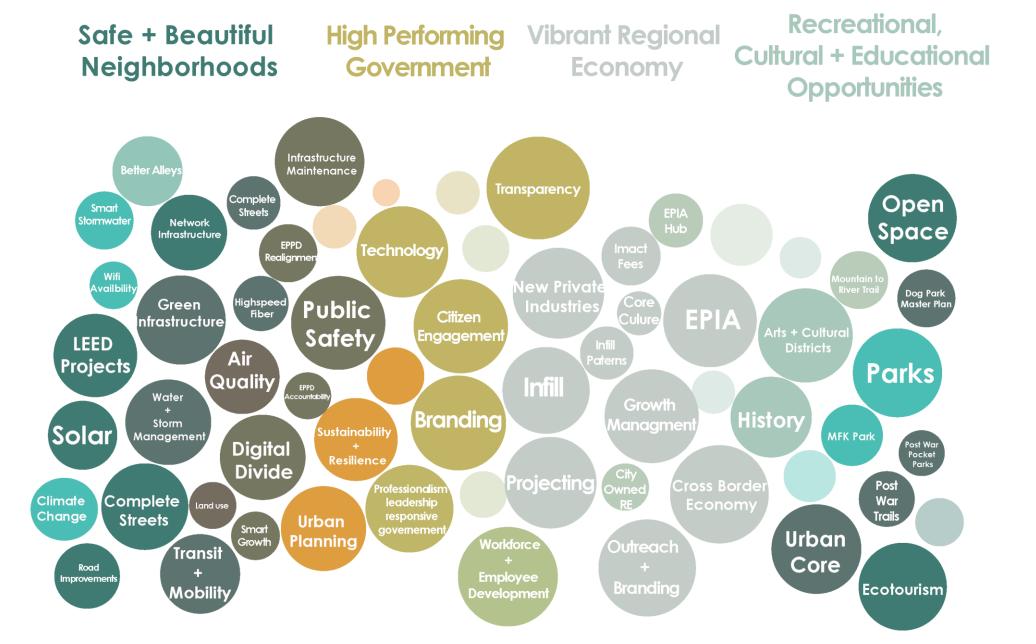

Need to do better

Doing well, but can improve
